Covid Scam, NATO Wars, Green Extremism: The Tyrannical Trifecta From Hell!

By: Chuck Baldwin
ChuckBaldwinLive.com

Everyone feels it, but not everyone sees it: America's greatest threat is not from Russia or China or from any other foreign government. America's greatest threat is from our own government in Washington, D.C. When will the American people get that through their heads?

The globalist devils inside the Beltway manufactured and implemented the Covid scamdemic: the greatest act of tyranny inside U.S. borders since Lincoln invaded the South.

The globalist devils inside the beltway have turned Europe and the world into a giant military encampment with U.S. and NATO bases on the doorsteps of almost every country on the planet, which only incites nations to retaliate.

The globalist devils inside the beltway have turned U.S. energy policies over to an extremist Green agenda that if fully implemented will turn the greatest nation to ever exist into a third world country. In fact, America is already headed in that direction.

From the Mises Wire:

When people start freezing to death in Europe this winter, who will be blamed? Regulations, Russia, the North Atlantic Treaty Organization? They all will be, but no one with a recognizable face or name will pay any price.

The war fueled by the US and NATO's expansionism and military involvement in Ukraine has worsened Europe's energy problem. In Poland, citizens are lining up in

their cars a mile from coal mines to buy enough fuel to prepare for winter. Due to the increased demand caused by the European Union's embargo on Russian coal, Polish families worry they won't have enough for the cold season. "This is beyond imagination; people are sleeping in their cars," Artur, 57, a pensioner, told Voice of America. "I remember the communist times, but it didn't cross my mind that we could return to something even worse."

Prior to the embargo, Poland was under pressure from EU environmental policy. To Polish families that rely on coal, Russian imports were a household staple due to lower costs. With Poland banning coal from Russia, locals must rely on coal from Polish state-controlled mines, which have rationed sales recently due to the high demand.

On a recent Tucker Carlson Tonight episode, the Fox News host covered the struggle of Europeans trying to secure heat for winter. Carlson highlighted countries like Germany and Poland, which are running out of fuel, forced to rely on coal or even timber. Could this imminent energy

calamity have been prevented? Carlson explained: Green energy cannot replace fossil fuels. Not now, not anytime soon. Fossil fuels remain what they have always been: the key to civilization. So-called green energy is not close, is nowhere near replacing gas, oil and coal. It's measurable. We could have known this. Anyone with eighth-grade math skills could have figured out in about 10 minutes that we cannot replace fossil fuels with renewables or green energy and of course, they must have known that.

While Carlson is right that the EU's obsession with the so-called green economy is coming back to haunt it, he left out that America's decades-long policy of foreign intervention has played just as great a role in the current crisis. Ron Paul has long warned of the risks associated with NATO expansion. In 2008, then representative Paul voted against a bill meant to encourage Ukraine and Georgia to join NATO.

At the time, Paul explained his vote with the following message: NATO is an organization whose purpose ended with the end of

Letter from the Editor

Leesa Bolden, Editor in Chief

Well folks, the curse of “May you live in interesting times.” is certainly upon us. The home of the Brave is nearly unrecognizable but fear NOT my friends, we are WINNING! If we all continue to put Faith over Fear we will set this world back on course. Continue to stay involved in your community and what is happening in the local government and make change in the only place you really can, your home.

Since before the Revolutionary War, the Original Gangsters have been working diligently to destroy America and create a One World Government. Klaus Schwab’s mentor, King Charles III, knew that the only way this could be accomplished was by indoctrination of the youth. Rockefeller and his cronies effectively enacted this plan, along with Western Medicine (as we know it) to make us both sick and dumb. Fortunately for us our Founding Fathers had knowledge of the evils of the World and protected us from it the best they could. They gave to us: The Constitution of the United States and we MUST keep it intact. Many

sold out our Nation out of greed and loyalty to evil. From the inception of the Zionist owned Federal Reserve in 1913 to current day sell out Joe Biden, America has been falling and failing our youth. We have allowed our children to be inundated with hatred for this country because of the blood on our flag, but every nation has blood on its flag. We must look past the indoctrination and be grateful for what truly sets us apart, our Constitution and get back to the original meanings of and regain our moral compass.

Begin to educate yourself on Saul Alinsky and look to your local ‘leaders’ to see if they are following his principles. We must eliminate these people from our societies. Pay close attention to candidates running for office. It is my belief that anyone who wants to be a politician, probably can not ultimately be trusted. We need statesmen to step up as our founding fathers did, out of necessity, not out of desire to obtain power. A true statesman will stand strong and be brave enough to stand up in the face of tyranny. Not only our political leaders, we must all stand firm on our principles and never cowardly adhere

to the masses to appease them.

I have been asked why I am not promoting candidates at this time. I see this so clearly that I can only say Vote the Red Line. It is our first step in advancing forward. We will get RINO’s out of the deal but we WILL deal with them as they expose themselves. Perhaps tried for treason with the verdict of death is what is needed. To me, RINOs are more sickening than Democrats, at least we know where they stand. For all races including the Town Council - pay attention to who is proud to pledge allegiance to this country and who is not. If there is any level of hatred for this Country within them, they have no place governing a town within it! You will see NO political ads in this issue because if I take one, I have to take them all and that appears to be an endorsement for those who I would never endorse. Money is not worth that!

There is so much news in the World today, I could not possibly report it all to you in 24 pages but I did my best. Please go to our website TPFNews.com for the extra articles that could not be included. I intentionally left out the Shenanigans until after the elections. We need to focus solely on the task at hand. By no means should

The Patriots Free Press Needs Your Help!

Show your patriotism & support what you want to see grow. Please go out of your way to thank our advertisers for their support and please share this paper.

We are building a good team but we need more help: writers, web design, digital warriors & distribution.

you (you know who you are) think you are off the hook of being exposed by us. I will mention the Quartzsite Town Manager was just UNANIMOUSLY given a nice fat raise in the midst of budget cuts across the globe and a declining population. Hmmm, a 5% raise while there is a 5% decline in population, smart thinking! I will also mention that Sheriff Ponce has informed me that he has no intention of filling out the questionnaire from CSPOA that you requested for he is already a member of Protect America Now. I will be meeting with media members of both groups on October 8th and will get details of this from them and report back.

Read the paper from wherever you are and send a digital copy to all of your friends and family, by purchasing a monthly subscription. The cost is only \$24/year! The website is TPFNews.com. We have a free section of bonus articles, videos and back issues so you can learn more about the Globalist agenda.

Advertise with us or become an Angel Investor with a one time or recurring donation, monthly or annually to help us to grow, defend the 1st Amendment and share information from the other side of the narrative.

We welcome evidence based rebuttals, constructive criticism as well as letters to the editor. Please don’t take it personally if I don’t publish it. Write or call let us know what you liked, what you didn’t and why, and please let us know what you would like to see more of.

Thank you again for your support, encouragement and bravery. Be sure that you are prepared!

Join us on October 23rd for a discussion on Voting the Red Line and the State Propositions you are voting on. In Person or on Zoom. See Events Page for more details.

Who is the Real Puppet Master in LaPaz County?

By: Kariann Noeltner

Who's holding the strings for how our county grows? What is their motivation? And what do we need to do about it?

Answering those questions gets more convoluted the deeper I dive into it. Every voter knows who is supposed to hold the strings. Laws are in place to ensure that our elected officials conduct themselves appropriately. Yet some still think the power is theirs to wield.

This story is about how land is used in this county. When operated correctly county officials would turn to the County Comprehensive Plan as well as written procedures in order to move the county forward.

We have a Comprehensive Plan that is written beautifully and can be found with a simple google search or with a little more effort on the La Paz County Website. If our county supervisors were following the plain language of our comprehensive plan then each social demographic would continue to be represented; from those that are retired and enjoy a simpler life to those that thrive on progress. Everyone from residents to businesses would be able to count on that plan to make smart decisions on where to put their money.

Two of our county supervisors are behaving like they are the puppet masters. That their vast education in County Planning and minimal social awareness is far superior to the wide demographics and actual expertise that was involved in the building of our Comprehensive Plan. The brazen audacity is astounding. Both have gone so far as to suggest that we

count ourselves lucky that we have people who know better and will do the "right" thing for this county. Even when their "right" thing goes against Arizona laws. But let's keep it real. They are not the puppet masters either. They have sold their strings higher up the proverbial food chain. I'm not here to speculate on the price. That will be better left to the AZ Attorney General's office.

The current "unlawful" and "unofficial" plan is to spot zone a nice respectable manufacturing plant into a residential area which will set a precedent. That paves the way for the rest of Highway 72 frontage becoming an unregulated and uncontrolled industrial/commercial corridor. One of the supervisors, in front of their attorney, told me that "light industry" is the residential buffer to heavy industry. He then proceeded to point to my map and ask me where a smelter goes and where a rare earth mineral refinery would go. Add to that, one of the land investors had the arrogance to lay the plan out for me in writing.

Anyone that followed the smelter debacle in Salome/Wenden knows how hard the District 2 Supervisor will push to introduce toxic companies into our neighborhoods (and that was not

even his district). His conduct and words have shown a zero social understanding of the demographics of rural residents and a single minded focus on money. Once the land is developed it is very hard to undo just look at the mess that the county and state are in with the Fondemonte deal.

As usual we were underestimated. They did not account for the collective knowledge, education, tenacity, and commitment to each other that has come out of this neighborhood. To be honest, for a brief moment we almost fell for it. That was until our county representative opened his mouth. We can spot a shyster from a county mile. So, that got me investigating.

I don't want you to take my word on any of

this. I am asking each of you to do your own research. This "spot zoning" goes before the Planning and Zoning Commission on October 6th at 4pm and before the Board of Supervisors on October 17th at 10am in Parker at the county offices. Please download the agendas and the attached documents, come, listen, and ask questions. And once you see that my research is sound then I ask you to stand up with us as we hold our county officials accountable.

Knowing what we know now, this neighborhood can not allow their plan to go through. Best case scenario the citizens are able to gain control of the strings again before a final vote is made. Worst case we will have to ask a judge to hand them back over.

First Annual Constitution Week in Lake Havasu City, Az.

By: Diane Klostermeier
2nd V.P. of Patriotic Americans for
Constitutional Education (PACE)

I found the Constitution Week events and talks a real blessing for our community. I want to thank the Daughters of the American Revolution for their success in having Congress in 2004 declare Constitution Week

every September 17th through Sept 23rd and holding the "Bell Ringing Ceremony" each year. I especially want to thank Mr. & Mrs. Tom Goodfellow for an outstanding Lake Havasu Constitution Week program that included outstanding, notable, guest speakers each

night for our city, its residents and our youth! They covered various aspects of our Constitution based on the Founding Fathers originalist viewpoint. The Founding Fathers, in the Preamble states: "**WE THE PEOPLE** of the United States, in Order to form a more perfect union, establish justice, insure domestic Tranquility, provide for the common defense, promote the general Welfare, and secure the Blessing of Liberty to ourselves and our Posterity, do ordain and establish the Constitution for the United States of America." The

Federalist Papers by Publius helped to explain and define the document which is the Law of our Land.

United States officials, elected and/or appointed, and those who serve in the military take an oath to support and defend the Constitution of the United States against all enemies foreign and domestic and that they will bear true faith and allegiance to the same and that they take this obligation freely and without any mental reservations or purpose of evasion. Many

military men have risked and even given up their lives to honor this oath and to preserve our freedoms.

The Constitution Week Board did an excellent job decorating the meeting places and they started with the respectful Presentation of the Colors by the Marine Corps League, the National Anthem and the Pledge of Allegiance. Each night a different guest speaker gave a very informative and memorable talk. I learned a lot and wish that more people would have been present. I can't thank the Constitution Week Board

enough for the beautiful plaque they presented to me. It was so totally unexpected and deeply appreciated and I was understandably tearful.

PACE, Patriotic Americans for Constitution Education, Students were asked to participate by saying the Pledge and Singing "God Bless America" Being that this was the first year for Constitution Week and that our PACE classes do not officially start until January, they weren't able to have as many teachers parents, and students for this

first year's program. PACE has a terrific newly elected Board who plan on expanding our participation for the next year's events. They even had someone represent Ben Franklin for the Week's event who provided one of his notable speeches. PACE teaches love of God and Country and about the Founding Fathers, the Constitution, the 28 Principles of Liberty and the responsibilities of good citizenship.

According to the 2004 Public Law 108-447 Section 111, it states that "Each educational institution that receives Federal Funds for a fiscal year shall hold an educational program on the United States

Constitution on Sept 17th of each year for the students served by the educational institution."

I was hoping that our two colleges and our high school principals and teachers would encourage their students to attend one or more of the week's events to hear the guest speakers and ask questions.

Our Youth are the future of our Country and they should learn about the many sacrifices made by our Founding Fathers to establish this Great Nation and the U.S. Constitution and that they too will do their best to add their talents and abilities to make this nation even better.

It is my sincere prayer that next year more people will take part and attend the Constitution Week's events! "We encourage all citizens

to use their influence to organize and support programs that honor the Constitution" and that they too will support and defend the Constitution of the United States against all enemies, foreign and domestic. May we, as citizens, use due diligence in voting and work to honor the goals of the Preamble to our Constitution. Our Founding Fathers risked their lives, their fortunes and their sacred honor to create this great nation of ours. How much are you willing to give of your time and capabilities for your country?

God bless America and may God bless each of you.

Arizona Veteran Granted Visits Previously Denied by Court-Appointed Guardian/Conservator, Vivian Hartless

PRESS RELEASE

J'aimé Morgaine, Executive Director of Real Change (928) 515-4333 PAC@yahoo.com

KINGMAN, September 20, 2022

An Arizona veteran who had been denied visits with his long time friend by the La Paz County Fiduciary appointed by La Paz Superior Court as his guardian-conservator was granted unrestricted visitation by Judge Duber at the veteran's annual hearing earlier today.

Real Change PAC has been advocating on behalf of the veteran's placement right for visits with family and friends since February of this year. La Paz County supported their Fiduciary with public statements that their Fiduciary's decision to deny the visits was within her court-appointed authority. Real Change PAC's unrelenting

advocacy pressed for the issue to be addressed by the Court that had appointed the veteran's guardian-conservator.

"Today's ruling by Judge Duber to not restrict Anna Camacho's visits with her long time friend is a great success for this veteran who had been denied his placement rights," said Real Change PAC's executive director. "It didn't matter that the judge ruled that the PAC had no standing and moved to strike the PAC's filed motions, because the information was still brought before the court. And we were fortunate to have found Otilia Diaz, the pro bono attorney who successfully represented Anna Camacho's request for contact."

Today's ruling for a "trial period"

of visitations will provide Judge Duber with a factual basis for deciding at the next hearing if a future evidentiary hearing is required.

According to Executive Director Morgaine, "This case has been a challenging personal learning curve for how to advocate

for veterans adjudicated into court-appointed conservatorships and guardianships, highlighting the

need for a better safety net for our veterans who have earned their rights of citizenship. We need to do a better job supporting our veterans and protecting their rights."

Real Change is a Kingman-based political action committee (PAC) working for non-partisan common ground issues across Arizona's 5th/30th Legislative District. Veteran advocacy is one of the PAC's ten core common ground issues. For more information www.RealChangePAC.com.

Ever Hear of Astragalus?

By: Herbmama (580) 490-1770 www.herbs-4-health.com

Astragalus is one of the most used herbs in TCM (Traditional Chinese Medicine). It is also known as Huang-qi or Milk-vetch root. In Chinese herbalism astragalus is reputed to strengthen the chi / qi / Life force.

It belongs to the legume family and is not toxic at any dose. This herb contains flavonoids, polysaccharides, saponins & trace minerals. It is just about the only herb that contains all 4 of these important elements!!

Astragalus strengthens, protects & supports the immune system. As we

all know a healthy, strong immune system is key to being healthy! Since inflammation is the root of most diseases, astragalus is an anti-inflammatory and therefore

can be key in the body's response to inflammatory conditions such as illness or disease. It also helps to strengthen the heart and can help reduce blood pressure. But people who take warfarin need to be cautious as it increases the body's response to steroids. Also if you take beta blockers they may not be as effective when taking astragalus. Just some words of warning there!

This adaptogenic herb is being rediscovered today. It can boost &

balance immune function and help to treat all types of infections that deplete energy. It helps to make the body's T-cells more aggressive. It strengthens digestion, lungs, the spleen & can protect the liver. It aids in adrenal functions. It also fights free radical damage. Studies show its ability to relieve insulin resistance and treat diabetes naturally. Astragalus is able to increase insulin sensitivity, protect pancreatic beta cells (the cells in the pancreas that produce and release insulin). It has been known to reduce or eliminate tumors as well. It can also help alleviate the horrid symptoms from chemotherapy.

Since it is an anti-inflammatory it seems to inhibit the release of histamines from cells. so it could help relieve hay fever & other allergies which can cause sinus issues.

Instead of directly attacking infectious organisms, it aids the body by fortifying every component of the existing immune system!

So why wouldn't one add this awesome herb to their daily regime??

Herbs 4 Health carries this awesome herb in tincture form. Got questions, don't hesitate to ask!!

This information is not meant to diagnose, treat or cure any type of disease or illness. It's strictly for informational purposes.

Test Your Scripture Skills

Paul requested the Thessalonians to have grace and peace.
True or False? (I Thes. 1:1)

Paul remembers these three things about the Thessalonians: work of faith, labor of love, and grace.. True or False? (I Thes. 1:3)

Paul commended the Thessalonians for turning from God to idols.
True or False? (I Thes. 1:9)

Christ will take vengeance on those who do not obey him.
True or False? (II Thes. 1:8)

We should pray for our worldly leaders so we can lead peaceable lives.
True or False? (I Tim. 2:2)

Hint... four are true and one is false.

Brief History of Poker

By: Parcian Editorial Staff
<https://parcian.org>

A significant amount of back and forth has taken place over the years regarding the history of poker. Many people are unaware of its roots, despite the fact that it is an extremely well-liked game today. There is a good chance that the word "poker" originated from the French word "poque," which was derived from the German word "pochen," which means "to knock." However, there are historians who are skeptical that the origins of poker are the same as those of other games with names that are very similar. The Persian card game known as "as nas" is very similar to the American game of poker. It's possible that Persian sailors brought the game all the way to New Orleans and taught it to the French colonists there. In addition to this, there is a theory that poker evolved from the card game known as "primero," which was common during the Renaissance. The English card game known as "brag" included elements of bluffing.

According to a statement made by an English actor named Joseph Corwell, the card game was first played in the city of New Orleans in the year 1829 using a deck that contained twenty cards. The game became popular throughout the rest of the United States as a result of the riverboats on the Mississippi River, which frequently navigated both directions of the river. Gambling was a very common activity for passengers on riverboat trips. After poker's popularity spread, a standard English deck of 52 cards was eventually incorporated into the game. The flush was a new feature that was introduced after the deck was changed. During the time of the Civil War, poker saw the introduction of three new games: draw poker, stud poker, and the straight. Around the year 1875 in the United States, the wild card was first

introduced. Around the same time, the games of lowball and split-pot poker became popular. The United States military introduced poker to a wide variety of countries, including those in Asia.

After the World Series of Poker was first held in Las Vegas in 1970, poker tournaments quickly gained in popularity worldwide. Ever since then, casinos in the United States have featured poker tournaments and table games. The 1970s saw the first publication of strategy books for general consumption. The first two books of this genre were written by Doyle Brunson and Mike Caro and were titled "Super System" and "The Book of Tells," respectively.

Two factors have contributed to poker's meteoric rise in popularity over the past few years. The advent of poker games played over the internet is the primary factor. There are now a multitude of online poker sites, and each day millions of people from all over the world log on to participate in poker games. The invention of the hole-card camera is the second factor that has contributed to the game of poker's meteoric rise in popularity. Because of this camera, the game is now considered a spectator sport. The World Series of Poker is broadcast regularly on ESPN and has seen a significant rise in the number of entrants over the past few years.

U.S. Act of War against the European Union: Did President Biden Order the Terror Attack against Nord Stream?

By: Prof Michel Chossudovsky
www.GlobalResearch.ca

“Sabotage is the most likely cause of leaks in two Baltic Sea gas pipelines between Russia and Europe, European leaders have said, after seismologists reported explosions around the Nord Stream pipelines.”

According to European Commission President Ursula Von der Leyen “the leaks” into the Baltic sea were due to “sabotage” “Any deliberate disruption of active European energy infrastructure is unacceptable and will lead to the strongest possible response,” she warned, and urged an investigation to get full clarity on the “events and why”.

Danish prime minister Mette Frederiksen described them as “deliberate acts”, adding: “We are not talking about an accident.” Von Der Leyen did not elaborate as to who might have been behind these “deliberate acts” of sabotage.

Bombshell

In a televised news February 7, 2022 interview the President of the United States acknowledged that the United States would act against Nord Stream if required. This statement was made 3 weeks prior to the Russian invasion:

President Joe Biden: “If Russia invades, that means tanks and troops crossing the border of Ukraine again, then there will be no longer a Nord Stream 2.”
Reporter: “But how will you do that exactly, since the project is in Germany’s control?”

Biden: “We will, I promise you, we will be able to do that.”

Joe Biden: “There will be no longer a Nord Stream 2”

The evidence suggests that this

terrorist attack had been contemplated by the Biden Administration prior to the Russian invasion. Was it carried out by the CIA?. “We will be able to do that” said Joe Biden.

U.S. Act of War against the European Union

Nord Stream which originates in Russia passes through the territorial waters of four EU member states including Finland, Sweden, Denmark and Germany. Permission was provided and approved by the parliaments of those countries prior to construction.

Moreover, the Nord Stream pipelines also required the approval of Estonia, Latvia, Lithuania and Poland, which were part of the consultative process prior to construction.

Bombshell

From a legal standpoint (International Law: UN Charter, Law of the Sea) this was not a terrorist attack against Russia, it was a U.S. Act of War against the European Union.

“La Classe Politique”: High Treason

America is not an Ally of the EU. Quite the opposite. The insidious role of the US in carrying out acts of sabotage against the EU is amply documented. Beyond doubt.

Meanwhile corrupt EU politicians are not only blaming Russia, they are setting the stage for the destruction of the European Union on behalf of Washington. High Treason at the highest levels of government.

What is required is “Regime Change” throughout the European Union as well criminal prosecutions directed against corrupt politicians.

[We must see a full regime change]

Biden’s Executive Order a Direct Threat to the Dollar

Paradigm Press

On March 9, 2022, President Biden quietly signed Executive Order 14067. [This bill can be read in its entirety at www.presidency.ucsb.edu/search/14067]

Buried inside this order is a sinister provision that could give the government unprecedented control

over your money and freedom. In fact, this provision sets the stage for:

- * Legal government surveillance of all U.S. citizens
- * Total control over your bank accounts and purchases
- * And the ability to silence all dissenting voices for good

It’s no wonder Fox News recently called this “a deeply troubling

development.”

Still, most Americans have never even heard of Executive Order 14067. That’s why today, Jim Rickards – a world-renowned economist and former advisor to both the CIA and the Pentagon – has just sounded the alarm on this troubling new development.

In his critical new presentation, he reveals the shocking truth about Biden’s Executive Order and why it’s a direct threat to the freedom of every single American citizen. In fact, according to Mr. Rickards, this order could mean the end of the U.S. dollar as we know it.

“We’re in for a major upheaval of the U.S. dollar,” he says.

“In fact, I predict the 3rd Great Dollar Earthquake has already started...

“The first was Roosevelt confiscating private gold in 1934...

“The second was Nixon abandoning the gold standard in 1971...

“Now,” he says, “Biden’s plan could pave the way for ‘retiring’ the U.S. dollar - and replacing it with this disturbing new alternative.”

And this is NOT some far-off pipe dream. This is happening right now.

“Executive Order 14067 already gives President Biden unprecedented power over the future of the U.S. dollar,” he says. “And sadly, most Americans will be completely caught off guard by it.”

POP's Corner - Arizona Propositions

POP - Pastor Of Problems
Gary Ensunsa

Proposition 128 Vote YES

A "yes" vote supports this constitutional amendment to allow the Arizona State Legislature to amend or repeal voter-approved ballot initiatives if any portion has been declared unconstitutional or illegal by the Arizona Supreme Court or U.S. Supreme Court.

My Thoughts: This is to our benefit as it prevents funds and the state legislators from acting on any proposition that is in direct violation of the State Constitution. This would make sure that even if a proposition is passed by the voters, it must comply with the State Constitution. This one gets a clear yes from me.

Proposition 129 Vote YES

A "yes" vote supports this constitutional amendment to require that citizen-initiated ballot measures embrace a single subject.

My thoughts: I wish all bills both in the State as well as Federal were single item. That way no "pork" or any other items could be added to a bill that is not on the single subject. It would be easier for the voter to understand and prevents "favors". The only downside is it may prevent support for bills and amendments. Abraham Lincoln ran into this issue when he was attempting to get the 13th Amendment, The Emancipation Proclamation to end slavery. In order to get support, he had to promise in the amendment certain "favors" such as aid to the legislators' constituents or to include a farm aid bill. Without the "pork" or "favors" this amendment would not have passed. Just a history lesson. All that said this Prop gets a yes from me.

Proposition 130 Vote YES

A "yes" vote supports allowing the legislature to set certain property tax exemption amounts and qualifications (including property tax exemptions for widows and widowers; those with total and permanent disabilities; disabled veterans; and property used for trade, business, or agriculture) and consolidating the constitution's property tax exemption provisions into a single article.

My Thoughts: This would consolidate

the tax exemption to a single article and allow legislators to determine exemptions to those who need it most: widows, widowers, those with permanent disabilities as well as disabled veterans. The downside is that it also includes exemptions for property used for trade, business, or agriculture. This could increase the tax burden for the rest of us who do not qualify from the above. Note none of the above are automatic, it just gives the power to the legislature to consider and act upon it. This proposition gets a yes from me.

Proposition 131 Vote YES

A "yes" vote supports this constitutional amendment to create the position of lieutenant governor, who would be elected on a joint ticket with the governor, and who would succeed the governor in case of a vacancy.

My Thoughts: I see two advantages on this proposition. First, in the event which happens a Governor decides to run for another office. This would allow the Lieutenant Governor to continue on in their place leaving no gaps in the operation of the Governors office. Second, both the Governor and Lieutenant Governor would be on the same ticket. Just like President and Vice President. This would keep the same party in place until the election. This one gets a yes from me.

Proposition 132 Vote YES

A "yes" vote supports this constitutional amendment to require a 60% vote for voters to pass ballot measures to approve taxes.

My Thoughts: This will change the vote for ballot measures and taxes from a simple majority of 51% to 60% I am all for making it tougher to increase taxes. The down side it will be harder to get Propositions to pass. This one still gets a yes from me.

Proposition 209 Vote YES

A "yes" vote supports setting a limit on interest rates for debt accrued from receiving healthcare services equal to either the weekly average one-year constant maturity treasury yield or 3%, as well as increasing the amount of value for certain property and earnings exempt from attachment, execution, forced sale, and any other debt collection processes.

My thoughts: The key is reduction of

interest rates on medical debt from 10% down to 3%. It would also increase the dollar amount on exceptions for debit collectors, as well as reduce the amount that can be garnish from wages. With rampant inflation, those with lower incomes will especially benefit. La Paz County average household income is at just over 30,000 a year. With the rising costs - medical is often ignored. The lower interest rates would help. This one gets a yes from me.

Proposition 211

A "yes" vote supports requiring that persons or entities that make an independent expenditure of \$50,000 or more on a statewide campaign or \$25,000 or more on a local campaign must disclose the names of the money's original sources, which would be defined as the persons or businesses that earned the money being spent.

A "no" vote opposes requiring that persons or entities that make an independent expenditure of \$50,000 or more on a statewide campaign or \$25,000 or more on a local campaign must disclose the names of the money's original sources.

My Thoughts: This would allow us to see where the money is coming from. At the same time, it requires any accumulated donations meeting the above amount to be reporting your info. This would also give info for the IRS, FBI for those of us who are MAGAS. This one I know people whom I respect on both sides of this issue. There is the element of the freedom of privacy and freedom of association. At this point in time I am torn on this issue.

Proposition 308 Vote NO

A "no" vote opposes allowing non-citizen students to receive in-state

college tuition, thus continuing to require out-of-state tuition rates for non-citizen students who attended for at least two years and graduated from schools in Arizona.

My Thoughts: We do not need to give additional incentive to encourage people to cross our borders illegally. This is a clear no for me.

Proposition 309 Vote YES

A "yes" vote supports making multiple changes to Arizona's voter identification and mail-in ballot policies, including requiring dates of birth and voter identification numbers for mail-in ballots and eliminating the existing two-document alternative to photo ID for in-person voting.

My Thoughts: This will give additional info when determining signature verification. It would also require the use of AZ driver's license or Az ID card. AZ ID will be issued free of charge and acts as valid ID where required outside of elections. Still will require proof of citizenship. If you want to make our elections to be easy to vote but hard to cheat this is a must YES.

Proposition 310

A "yes" vote supports creating a 0.1% sales tax for 20 years to provide funding for the state's fire districts.

A "no" vote opposes creating a 0.1% sales tax for 20 years to provide funding for the state's fire districts.

My Thoughts: This is a tax increase the vote will most likely go no for bigger cities and yes for rural and small towns for fire departments. If you want no new taxes under any circumstances, then this one is a no for you. If you feel the need for rural Fire Departments to have additional funding, then you will vote yes. This one is up to the individual.

AZ Trannyfest Will Cost You \$1.7 Million

Audio transcript of The Stew Peters Show
StewPeters.com

My name is Stew Peters. It's time for some real talk about the transnians. There are a lot of problems in this country, no doubt. Our authorities let criminals roam free and attack people with impunity. They force killer shot mandates on everyone, including kids. They murdered millions of small businesses with communist overreaching tyrannical draconian COVID lockdowns.

These are all grossly evil, but there's probably nothing more evil that this regime is doing than the campaign to promote transgenderism to children nationwide. In the Bible, Jesus Christ says "Whoever causes one of these little ones who believe in me to sin, it would be better for him if a millstone were hung around his neck and he were drowned in the depths of the sea." And more so than any other thing happening in America right now, that is what the transgenderism frenzy is about. It's about taking our most vulnerable people, our children and teenagers and convincing them to mutilate and destroy their bodies. It's an entire political movement dedicated to defiling the bodily temples that God gave to us.

I'm going to apologize in advance if any of what I'm about to tell you is disgusting or upsetting. But all of you don't just deserve to know the truth, you need to know the truth because most of these feckless, fake Republican lawmakers dance around the truth here. First of course, they're caught up and worried about your feelings, they don't want to gross people out. And second, probably more important, if they told people the full truth then their obvious failure to actually do anything [about it] becomes even more openly cowardly, and obviously indefensible. Here's the truth. Everything about the transgender movement is built on lies. Lies created by the most depraved and monstrous people you can imagine. Let's start with the big lie. The lie that transgender people are women trapped in men's bodies or vice versa. This is totally untrue.

Here's what male to female transsexuals really are. They're sex fetishes. That's it. Here's the origin story for Rachel Levine and Caitlyn Jenner. And all of the rest of these male to female tranny monsters that you see relentlessly pushed on television. Their origin story is this when they were children. They enjoy dressing up in their mom's underwear or their sister's underwear and then masturbating while looking at themselves in a mirror. Seriously!

And this isn't something that we made up. No, in 2003 Northwestern Professor Jean Michel Bailey wrote about all of this in his book, "The Man Who Would Be Queen." Bailey is actually a liberal who's okay with this kind of sick stuff, but he's also honest enough to believe in describing it accurately.

So that's how it starts. With him dressing up in mommy's underwear. Then as they get older, they start cross dressing more and more. They wear women's underwear while out in public, then they start trying to pass as a woman completely. They fail, but of course, these days people are just too frightened and cowardly to say the truth or they're so mentally ill and deranged that they trip over themselves to talk about how beautiful and feminine these freaks look. But eventually, of course, even this isn't enough, their fetish just gets more and more powerful as time goes on. So for some of them they want to literally be women. Those are the ones who end up getting surgery. They use laser treatments to remove their facial hair. They get their jaw bones and Adam's apple shaved down to look more feminine they chopped their dicks off and replaced them with these disgusting open wounds that ooze pus and blood, which they pretend is a vagina. No, these aren't vaginas. These are literally injuries. They need to dilate them every day or else the body will close these holes up. Why do they do all of this? Well because it's their fetish. Because what gets them off is the idea of transforming into the women that they're attracted to.

None of these people want to actually be like real women. No, they want to be a fake cartoon version of a woman. They want to be the women that they see in pornographic movies because that's all this is. The depraved broken thoughts of sex addled creeps. Here's some more proof of what these people are really like. In the United Kingdom overall 16% of male prisoners are in prison for sex offenses. But among transgender prisoners in the UK 59% are sex offenders. These aren't women. They're like monsters who have combined the worst traits of men and women together and now our

evil regime is demanding that we worship them like gods and what these monsters want is access to victims. And the chance to make more people like them. That's why we have that teacher in Canada, who's wearing cartoonishly huge fake breasts. As we explained the other day, he's literally just a pedophile who gets off by forcing the people around him, including children to pretend that he's a woman.

Basically, the entire growth of transgenderism the last few years is about indulging and enabling these people. All those female to male transsexuals that are popping up now. They're mostly just vulnerable girls who are upset about going through puberty and being bombarded by our hyper sexualized culture. Instead of being offered the support that they need, they're being told that they're secretly boys on the inside. Most of this is just to indulge the fantasies of the sick sex perverts, who we just mentioned, by perpetuating the lie that people can be born in the wrong body. Already there are hundreds of people who are realizing they were duped and who are de-transitioning in response. In a few years there will be 1000s of these people. Because this isn't real medicine. It's a fad, a fad that sucking up 1000's of our young girls to indulge the fantasies of demon possessed men who frankly deserve to be in prison or on a gallows.

Karen Vanderjagt is the leader of a group "700 Mothers, Grandmothers and Mothers to Be" in Arizona. They've come together to fight against mask mandates, critical race theory and the transgender frenzy ripping through Arizona schools. Karen herself is an Arizona certified special education teacher who also homeschools her own children. Her group has already had a lot of successes. They got a state of emergency in her town of Lake Havasu repealed. They prevented new mandates from being imposed, and they've helped save the jobs of some vax resisting hospital workers. But all of that was just a prelude to the battle over transgenderism that's about to unfold. Next February Lake Havasu is planning to put on

Continues on Page 11

It also mentions "5.6% Sales Tax" and includes a map showing the location near MacArthur Blvd and Little Finger Rd.

The Patriots Free Press

11

Continued from Page 10

a massive drag show as part of the Arizona pride tour. The whole thing is going to benefit from \$1.7 million in taxpayer funds. But when Karen and her allies spoke out against this they got denounced as bigots. Of course. They will not be denounced here, Karen Vanderjagt joins us now. Karen, thank you so much for coming.

Karen Vanderjagt: Yes. Thank you for having me today. This is something that needs to go nationwide and we need the support of people in every town. This is going

on everywhere, I know, but right now we're fighting a battle. We keep going before the city council. We've gotten on the radio and in the newspaper. We've been on the front page of our local newspaper fighting this. They've done an article in The Patriot Free Press about our group and what we're trying to accomplish. We have it out there, but we go to the city council meetings and we are just dismissed. We are told that we are bigots. Right there, we told them that we are not bigots. The people that are bigots are the people that are accusing us really, but our fight is for the kids. They're being used as props in adult sexual fantasies. That's the thing. Modern day flashers is what they are. This is not about live and let live. This is a sex crime. So we need to keep the children safe.

Stew Peters: I'm old enough to remember, growing up and being shown pictures of what a weirdo in a van by the park might look like. And having these freak shows run around with trench coats on. Remember that? And they would be flashing kids wearing trench coats. This is exactly that thing and not only is it right out in the open, it is protected by a government that has an enforcement arm to shut down any dissent to all of this.

Karen Vanderjagt: Right? Like I said, they're modern day flashers, and we're just letting it happen. Children can't be used as a way to titillate the sex drive of these grown men making fun of women dressing up in their garish makeup and their garish clothes and wanting the attention of

the children. I would just say hey, go ahead and have the show but leave the kids out of it. We don't want the kids there. So that is our main concern. But we are fighting a battle with our city council right now. It is really serious. They are pretty much just ignoring us and you write a letter to our mayor and he just says, well this is on private property and you know everyone

should have a right to choose whether they bring their children or not.

Stew Peters: People that are bringing children there should be arrested for child abuse. They should be arrested for child molestation and sexual abuse of these children. These children are not old enough to make a cognitive decision whether or not they should be present at something like this. And most of them, I can't imagine their faces when they actually see this. What's the real reason that these sick and depraved demonic individuals want kids there?

Karen Vanderjagt: Well, they want them there. They're titillating their own sex drive, because when the children are in front of them, it gets them excited. And that's the whole reason. If we said hey, no kids there, would they still do it? Would these drag shows even be done? So the mayor of our city, it's on his property. He owns the Lake Havasu Resort, and he is the manager. Of course, he's saying, well, it's on private property. Yeah, it's his private property. And of course, they're sold out. They're making lots of money. So it benefits him too.

[CORRECTION The Mayor is the Manager of the Property not the Owner of it.]

Stew Peters: What is the Mayor's name in Lake Havasu?

Karen Vanderjagt: His name is Cal Sheehy and he is the Mayor. The other really offending person is our Vice Mayor, Jim Dolan. This man is out of control. He makes fun of us. He, along with councilmen Moses just rolls his eyes when we get up to talk. We have two women in the group who have

spoken out for us. I wrote a letter to all of them and said, you know, our Vice Mayor Dolan called us bigots after two and a half hours of people coming up with testimonies of how this is so wrong. In the letter I said, are you all agreeing with him? Because according to the rules, you're not supposed to give your personal opinion. I had two people write back, Councilwoman Campbell and Councilwoman Lin. You don't need to write them any letters. They are totally with us. They are fighting this thing.

We have found some laws that apply in our city. Arizona revised statute Title 13 Criminal Code § 13-1402, which talks about indecent exposure, but it also goes into minors. Now we're finding out there's another law on the books, the Cabaret Law, which we're working on. So we have several tools. We're trying to introduce them. We're saying this is not live and let live. This is a criminal offense. They need to be arrested. This thing needs to be closed down.

Stew Peters: This Mayor Sheehy, I don't know if he's a pedophile or not, but it certainly seems like it. This is his property that he manages. He's using the excuse of "this is private property." So obviously he wants to sit back in the corner and get off on little kids being in the presence of freak shows that are exposing themselves in Lake Havasu, Arizona.

Karen Vanderjagt: I don't want to say for sure.

Stew Peters: Well, I'll go on circumstantial evidence, I guess. **My opinion** is that he's a pedophile.

Karen Vanderjagt: We know that this is connected with pedophiles because the website that is connected to this whole thing has the triangle that goes inward which means that it is a pedophile. What is it called MAPS

minor attracted people?

Stew Peters: Yeah, this is an FBI identified insignia. That's what it is. And so it's not to be taken lightly. This is actually real. This is when the FBI was actually chasing real criminals that produce

real victims and actually protecting the public before they got their new duty of being the enforcement arm, the Gestapo, the secret police of the illegitimately installed regime. Karen Vanderjagt, thank you so much for fighting in Arizona, the supposedly red state that is allowing this pedophilia to happen right out in the wide open. Thank you so much. God bless you.

Alright Stew crew. So here we go. Here's this guy right here, Sheehy,

look at this creep. This is the guy who manages the property that he is going to allow this public molestation and sexual depravity to happen and invite children. They wouldn't otherwise be having the event if children were not going to be there. Because that's how these pedophiles

operate. So here is Sheehy, look at this guy. What a creep this guy is. Alright. Stew Crew here is the information that you've been waiting for: his phone number is 928-453-4152 and his email address is SheehyC@LHCaz.gov you know what to do.

[Karen Vanderjagt had intentional goals as a guest on the Stew Peters Show. She wanted to bring awareness of how these "kid friendly" shows are invading even small towns like Lake Havasu and once established, it is a battle to exclude minors from these "cabaret" type of events. These battles involve dismissiveness and name calling by the council. She also wanted to see a massive amount of emails sent to council members and the mayor to show power and support. Sadly, The Stew Peters Show spent unnecessary time calling the mayor a pedophile and presenting him as a "creep." This has caused irreparable damage and could hurt their cause and their ability to go forward. Karen would like to say that she did not call the mayor a pedophile and many of the words were said after they had finished the interview.]

How to Protect Yourself from EMF Exposure

Bill Lowstuter, Electrical Engineer
BillLowstuter.substack.com

This is a follow up of my article in the September issue of "The Patriot Free Press" titled "Connecting the Dots: 5G – The Ultimate Weapon of Mass Destruction" on pages 11-14.

Due to the substantial body of credible science documenting harm from exposure to various levels and frequencies of wireless radiation, a precautionary approach to the widespread deployment of wireless technologies must be a top priority to reduce potential harm to the public and the environment. Electromagnetic Fields (EMFs) are toxic to humans, all animal life and all plant life. EMF affects the function of cell membranes and can lead to DNA dysfunction: they have an impact on anything with DNA. And that includes plants, animals, insects and even microbes.

Extensive, peer reviewed testing has demonstrated that all EMF radiation, especially 4G and 5G frequencies, interfere with the electrical functioning of the human body, can cause the symptoms exhibited by Covid-19 and the many flus, cause cancer and other debilitating reactions.

The single most powerful way to protect yourself is to reduce your exposure to EMF in the first place.

Dr. Joseph Mercola has written a book titled "EMF*D – 5G, Wi-Fi, & Cell Phones: Hidden Harms and How to Protect Yourself". This article is a short summary of a forty page chapter in his book of three hundred pages. This is by nature a very technical subject. I highly recommend his book.
www.mercola.com.

Part of the reason why EMFs are so dangerous is that, like X-rays, they are invisible, silent and odorless. Unless you are EMF hypersensitive, you won't see, feel or hear your EMF exposures. This is why it is crucial to invest in devices that can locate and measure all hidden sources accurately.

Before you do anything to reduce

your physical exposure to EMFs, it is vital for you to know your physical exposure to EMFs by measuring radiation levels already present. Measuring first provides you with a baseline and dramatically helps you to fine tune your mitigation efforts so they can be as effective as possible. The ability to see and hear current readings detected by EMF measuring devices will motivate you to take immediate action to address them.

There are four types of meters that measure four different types of EMF radiation. Max = Maximum EMF Safety Threshold

- 1) Alternating Current Magnetic Fields (MF) Max 5 milliGauss or 100 nanoTesla
- 2) Alternating Current Electric Fields (EF) Max 50 Volts per meter
- 3) Radio Frequency Radiation Fields (RF) Max 0.20 milliWatts per square meter
- 4) Dirty Electricity Max Threshold varies depending on the meter you use; check manual

The Magnetic Fields are generated by motors in refrigerators, air conditioners and fans. They are the M in EMF.

The Electric Fields are created by the electrical 110/220 volt alternating current (A/C) in your house wiring and the overhead power lines. They are the E in EMF.

The Radio Frequencies are generated by all of the electronic devices in your home, e.g. cell phones, TV, stereo equipment, computers, video games, cell phone chargers, etc. They are the F in EMF.

Dirty Electricity, also known as dirty power or electrical pollution, are high voltage transient spikes riding along on the 50 Hz (Europe) or 60 Hz (USA) power lines provided by the electric company. The interference is created by electrical devices as they operate, primarily in your home and include cordless phones, video game systems, fluorescent lights, dimmer switches, pool pumps, heat pumps, air conditioners, inverters on solar panels, hair dryers, washers, dryers, electric heaters and stoves, dishwashers, furnaces, and battery charging power supplies for electronic devices (such as TVs, phones, monitors, and computers).

You can purchase the meters yourself or hire an EMF professional. Dr. Mercola's book has a chapter on Resources which provides information on meters for measuring all four of the types of radiation that is hazardous to your health. The types of meters, functionality, and cost can be researched on the internet. There are many meters and you will need more than one to measure the 4 types of fields. There is no best meter. You can search for the meters on the internet under EMF meters.

I purchased a Trifield Model TF2 EMF meter for \$180 which measures Magnetic, Electric and RF fields. I have taken readings on every electrical appliance in the house from varying distances with the power off and on. The further away you are from the source the less the field strength. If you double the distance from the source, say from one foot to two feet, the field

strength decreases to one fourth the power. Moving from one foot to ten feet reduces the intensity to one hundredth or 1%. Move sources further away to reduce your exposure. www.trifield.com

I also purchased a Greenwave Dirty Electrical Test Kit with a broadband Electromagnetic Interference (EMI) meter and three Dirty Electricity plug-in filters for \$186. I tested electrical outlets throughout the house. The highest dirty electricity reading was the plug at the head of our bed with 258 millivolts. The maximum recommended level is 25 millivolts so we were receiving 10 times the maximum dirty electricity radiation. When I plugged in the Greenwave filter, the reading dropped to 23 millivolts. We are sleeping much better now. The filters are available separately for \$35 each. www.greenwavefilters.com

Dr. Mercola also has suggestions on various types of protective devices such as: shielded cables, RF shielding, wire mesh boxes, Faraday bags, protective clothing, shielding paint and an EMF shielding sleeping tent. Faraday was an English scientist, who died in 1867. He contributed to the study of electromagnetic fields (EMF), electromagnetism and electrolysis. His work formed the foundation of the electric motor. He was one of the premier scientists of his day.

EMF remediation four basic principles;

- 1) Avoid unnecessary exposure to EMF's, especially inside your own home and from your personal devices (such as your cell phone), where you have the most control.
- 2) Put as much distance as you can between you and the EMF's you can't avoid.
- 3) Decrease the amount of EMF exposure coming into your home from external sources.
- 4) When all else fails, shield yourself.

General Household Remediation

If you still use a microwave oven, consider replacing it with a steam convection oven, which will heat

Continues on Page 13

*****Continued from Page 12*****
your food as quickly and far more safely. Don't stand in front of the microwave oven when it is on.

Avoid using "smart" appliances and thermostats that depend on wireless signaling. This would include all new "smart" TVs. They are called smart because they emit a Wi-Fi signal and, unlike your computer, you cannot shut the Wi-Fi signal off! Consider using a large computer monitor as your TV instead as they don't emit Wi-Fi.

The personal assistant electronic devices such as Alexa and Siri are continually listening to every sound and communicating with the cloud via Wi-Fi EMF radiation. Don't use them or at least unplug them at night.

Replace Compact Fluorescent Light (CFL) bulbs with incandescent bulbs. Ideally, remove all fluorescent lights from your house. Not only do they emit unhealthy light, but more importantly, they will actually transfer current to your body just by being close to the bulbs. While LED bulbs are more efficient, they do produce an EMF field because of the electronics that convert the 120 volt A/C voltage into the low voltage direct D/C current that is needed for the LEDs.

Modern Dimmer switches are another source of dirty electricity. So consider installing regular on/off switches rather than electronic dimmer switches.

Refuse smart meters as long as you can, or add a smart meter guard to an existing smart electric, water and gas meter, some of which have been shown to reduce radiation by 98%. They are available from smartmetercovers.com and <https://smartmeterguard.com/?afmc=1uf>

Daytime strategies to reduce necessary EMF exposure

To reduce EMF exposure during the daytime, consider using Stetzer or Greenwave filters which plug into the outlets, to decrease the level of dirty electricity or electromagnetic

interference being generated in your wiring. You can also take these with you to work or when you travel. This may be the single best strategy to reduce damage from EMF exposure. It appears that most of the

toxic effects are generated by the frequencies that the filters remove. www.stetzerelectric.com or www.greenwavefilters.com.

Connect your desktop computer to the internet via a wired Ethernet connection and be sure to put your cell phone in airplane mode. Also avoid wireless keyboards, trackballs, mice, game systems, printers and portable house phones. Opt for the wired versions.

Avoid carrying your cellphone on your body unless in airplane mode and never sleep with it in your bedroom unless it is off or in airplane mode. Airplane mode turns off all Bluetooth, Wi-Fi, cellular and data connections on your mobile device which might otherwise interfere with the electronic equipment on a commercial airplane. Even in airplane mode, it can emit signals, which is why it is actually best to put your phone in a Faraday bag. They are highly effective at blocking radiation. They are really inexpensive and only \$10 to \$20 for two of them. www.faradaybag.com When using your cellphone, use the speakerphone and hold the phone at least 2 feet away from you. Seek to radically decrease your time on your cell phone, computer and other electronic equipment.

Rather than using a cellphone, use Voice over Internet Protocol (VoIP).

VoIP software is a telephone service that you can use while connected to a computer. It converts voice signals into digital data and sends them across the internet via a router. Search for VoIP phone systems on the internet.

Nighttime Remediation

Use Stetzer filters that plug into the electrical outlet in the bedroom to remove the dirty electricity voltage transients from your electricity. Use meters to confirm that they are in a safe range. www.stetzerelectric.com

Avoid using electric blankets or mattress pads. You are sleeping in a huge electric field that does not allow for deep, rejuvenating sleep.

Use a battery-powered alarm clock, ideally one without any light. Use a talking clock for the visually impaired. When I measured the fields broadcast by my plug-in LED alarm clock in the bedroom,

are sleeping. Ideally, work toward hardwiring your house with Ethernet cable connection so you can eliminate Wi-Fi altogether. It's important to realize that if you have a Wi-Fi router, you have a cellphone tower inside your home! Ideally, eliminate your Wi-Fi and simply use a wired Ethernet connection. If you absolutely must have a router, you can place it inside a shielded Faraday bag when not in use. You can find shielded items online or make your own using Swiss Shield fabric. If you have a notebook without any Ethernet ports, a USB Ethernet adaptor will allow you to connect to the internet with a wired connection. www.faradaybag.com, www.swiss-shield.de/en

For more extensive shielding, you can consider painting your bedroom walls and ceiling with special shielding paint, which will block RF from outside sources, such as cell towers, smart meters and radio/TV towers. Windows can be covered with metal window screens or film. For your bed, consider a shielding bed canopy. www.mercola.com

After all the reading I have done on EMFs hazards, the testing using the meters and the articles I have written on its harmful effects on all life, I now take EMF's very seriously. 5G is being "deployed" throughout the world, which is military terminology. It is virtually impossible to achieve high levels of health in the 21st century unless you are addressing your EMF exposure and giving your body what it needs to repair the damage this exposure causes. EMF radiation is hazardous to all life on earth, including our forests, fields and waterways.

Say NO to 5G!

I was surprised at the high level of radiation emitted by the electronics and unplugged the clock. We are now using a battery clock.

Consider moving your baby's bed into your bedroom instead of using a wireless baby monitor. The EMF radiation from the monitor is very harmful on the small body of a baby, from organ damage to brain damage. Alternatively, use a hard wired monitor.

If you must use Wi-Fi, shut it off when not in use, especially at night when you

Tyrannical Trifecta From Hell!

its Warsaw Pact adversary. This current round of NATO expansion is a political reward to governments in Georgia and Ukraine that came to power as a result of US-supported revolutions, the so-called Orange Revolution and Rose Revolution. Providing US military guarantees to Ukraine and Georgia can only further strain our military. This NATO expansion may well involve the US military in conflicts unrelated to our national interest.

The US support for NATO membership for Ukraine continues. Russia did not want to risk seeing this come to fruition and engaged militarily as a result. Biden is also personally involved, as he was a key player in turning NATO into what it currently is. In 1998, then senator Biden voted in favor of expanding NATO to include Poland, Hungary, and the Czech Republic, stating that this move would be “the beginning of another 50 years of peace.”

As Paul wrote recently, Biden was quite off. Unfortunately, as we have seen this past week, my fears have come true. One does not need to approve of Russia’s military actions to analyze its stated motivation: NATO membership for Ukraine was a red line it was not willing to

see crossed. As we find ourselves at risk of a terrible escalation, we should remind ourselves that it didn’t have to happen this way. There was no advantage to the United States to expand and threaten to expand NATO to Russia’s doorstep. There is no way to argue that we are any safer for it.

Amen! America’s constant meddling, interventions, trade sanctions, false flags, forced regime changes, political assassinations, breaches of state sovereignty, bombing campaigns, clandestine terror campaigns and proxy wars around the world have created the vast majority of global conflicts and domestic recessions since at least World War II.

Conservatives and Christians twice, in 2008 and 2012, had an opportunity to nominate a true constitutionalist and patriot, a true pro-peace non-interventionist and a true Christian gentleman, Dr. Ron Paul, for President of the United States. Instead, they stupidly rejected Dr. Paul’s candidacy and chose two of the most controlled and corrupt politicians in modern history: John McCain and Mitt Romney.

Look what’s happened since.

America now has undoubtedly one of the most amoral, inept, incompetent and criminal

governments, not only in the world today but in world history!

And as far as the mainstream media goes, it is truly nothing more than a Ministry of Propaganda for the Deep State. And speaking of the Deep State, conservatives everywhere love condemning it—and talking about Klaus Schwab, Bill Gates, George Soros, Henry Kissinger, et al.—but almost none of them ever mention the sizeable influence within the Deep State exerted by Zionist Israel. But you’ll never truly understand the Deep State if you do not understand the immense influence that Israel wields over it. For starters, just **take a peek at who controls the Federal Reserve.**

I would like to believe that things would get better if Republicans took control of Congress this November and the White House in 2024, but the harsh reality is

Republicans have a masterful way of talking a lot while changing almost nothing.

I have no confidence in politicians from either party having the courage to make the hard decisions that would help correct the direction of

our ship of state from the path of destruction that it’s currently on.

It would help tremendously if America’s pastors would step up to the plate and demonstrate some courageous leadership. But they have already proven what they are willing to do: NOTHING! [a few have shown incredible bravery]

The Covid scam, NATO wars and Green extremism are the tyrannical trifecta from Hell.

Defeat these three satanic attacks against our liberties, and you will solve a host of problems, not the least of which is inflation and our overall economic malaise.

The Covid tyranny has already doomed the lives of millions who foolishly took the jabs and forever enslaved the minds of millions more. The expansion of NATO and America’s perpetual war agenda has brought us to the precipice of nuclear war. And if allowed to grow into maturation, the Green agenda will do as much—if not more—damage to our country than nuclear war.

Looking back, I wonder if Ron Paul’s candidacy was America’s last opportunity to set its ship of state aright. In a spiritual sense, when Christians and conservatives rejected Dr. Paul, they rejected the Biblical Natural Law principles that he represented.

At some point, the chickens come home to roost—even for America.

Jan 6th Prisoners – Detained & Forgotten

By: Robert B. Charles
AMAC.US

More than 800 Americans, among tens of thousands who protested irregularities in the 2020 election cycle, stormed the Capitol on January 6, 2021 – and were arrested. That event is now 15 months behind us. Why, in our land of “liberty and justice,” are many still detained?

The point of this piece is not to relitigate the protest, election, charges, or anything to do with politics. It is to focus on a simple idea – due process and rule of law. As a former US Court of Appeals clerk, New York, and DC litigator, and – rather ironically, former Assistant Secretary of State to Colin Powell for global issues, including law enforcement – the conditions and state of these cases, many unresolved, is a concern. Reports flow in – through family, friends, official and credible channels – that these detainees are isolated, living in poor conditions, cannot meet with reporters, are increasingly invisible, just forgotten people. That is not how America works.

The Department of Justice has an incomplete, frighteningly suggestive reporting system, that indicates one case was dismissed, some resolved by plea,

70 adjudicated – but many in perdition, facing seemingly eternal punishment and damnation, no resolution on the horizon. Whether hundreds or “just 40” as one article argues, one is too many.

How can this be, in a nation with a Bill of Rights, which promises “no person shall be ... deprived of life, liberty, or property, without due process of law” (5th Amendment)? The Bill of Rights notwithstanding, many charged individuals remain untried, still mysteriously detained?

Consider the 6th Amendment. “In all criminal prosecutions, the accused shall enjoy the right to a speedy and public trial...” Has that occurred? “...by an impartial jury of the State and district wherein the crime shall have been committed...” Has that occurred? Continuing: “...confronted with the witnesses against him; to have a compulsory process for obtaining witnesses in his favor...” Has that occurred? “...Assistance of Counsel” Occurring?

The answer? Who knows? The record is strangely incomplete, access restricted, word barely getting out, and what we know is not reassuring.

What we know, based on official reports of DC

jails where many are held, is just conditions are incorrigible, in some cases objectively inhumane and indefensible. Specifically, many seem to be isolated, facing poor health, living conditions, treated as if undeserving of the kind of constitutional standards they

deserve. Members of Congress, notably Republicans, have decried conditions as intolerable. One noted: “What’s happening to these people being held in custody is wrong, it’s unconstitutional - a violation of their rights. Even mainstream media and judicial authorities have begun to acknowledge things are not right.” So, what can be done to assure that America – unlike Russia, China, and half the politicized legal systems of the world – does NOT hold, detain indefinitely, mistreat, forget, or otherwise leave an impression that political prisoners exist, part of a nefarious “two-tiered system?”

A lot.

First, the exact status of all cases should be made public now, and every succeeding day. That should not be hard. Every American is owed that clarity.

Second, reporters, family, friends, and concerned citizens should be able to meet with these indefinitely detained individuals. Not to do

so raises serious suspicions, suggesting those in charge can do as they wish, are unaccountable. That is not good for the detained or any of us.

Third, counsel by name – for all detained individuals – should be made public. Like Fifth Amendment assurances of due process, Sixth Amendment guarantees are not negotiable. Fourth, with the consent of the detained, televisions cameras, congressional investigators, members of Congress, relevant State officials should be permitted to see these individuals and conditions.

Fifth, especially in these cases, justice should return to being swift and fair, since the question now arises whether a Democrat-controlled federal and DC

government, where anti-Trump feeling runs strong, could be intentionally disregarding these Americans, letting them languish.

Many years ago, as an Assistant Secretary of State, one of my priorities was assuring any influence America

had to seed and preserve rule of law around the world, fair treatment, and generic respect for those arrested, charged and detained was understood by foreign officials.

Many times, these officials had a political agenda tied to holding prisoners. Aware, we stood against politics in the legal process. We must now hold ourselves and those in power to that standard.

Bottom line: The January 6 defendants deserve protection against the perception and fact of political punishment. Only that assures rule of law. Absence violates rule of law. They cannot be detained and forgotten, not in America. The time is now to insist on that standard and proof of it.

Peer-reviewed Paper - Curing the pandemic of misinformation on COVID-19 mRNA vaccines through real evidence-based medicine. A look at the true benefits and harms of mRNA.

NakedEmperor.substack.com

A British doctor, Aseem Malhotra, has just had a two part, peer-reviewed paper published in the Journal of Insulin Resistance. The aim of the paper was to gain a better understanding of the true benefits and potential harms of the mRNA Covid vaccines. You can read Part 1 and Part 2 in full by clicking on the links [at NakedEmperor.substack.com]

Dr Malhotra. a cardiologist by trade, was originally a strong Covid vaccine advocate. He volunteered in a vaccine center, was one of the first people to be double dosed and appeared on morning television to encourage everyone to get vaccinated. He was surprised and concerned at vaccine-hesitant patients when they asked about 'anti-vax' propaganda.

That was until, sadly, in July 2021, his father suffered a cardiac arrest and died. His father had been the former deputy chair of the British Medical Association (BMA) and honorary vice president. The 73 year old gentleman was extremely fit and active and heart scans from a few years earlier had revealed no significant problems. Dr Malhotra was shocked to read his father's post mortem which found that two out of three of his major arteries had severe

blockages.

Aseem couldn't explain the post mortem findings and became more concerned in November 2021 after reading a peer-reviewed abstract in Circulation Journal. In the study, the mRNA vaccine was associated with significantly increasing the risk of a coronary event within five years from 11% pre-mRNA vaccine to 25% 2-10 weeks post vaccine.

He began to question his father's death and wondered whether the Pfizer vaccination he had received six months earlier could have contributed in some way. After six months of critically appraising the data and speaking to eminent scientists, he reluctantly concluded that, contrary to his own dogmatic beliefs, Pfizer's vaccine was far from being as safe and effective as first thought.

Questioning the data

During his reassessment of the Covid vaccine he recalled a conversation with a cardiologist colleague who decided against vaccination due to his low personal

risk and concerns about short and long term harms. His colleague was particularly alarmed that, during the trials, there had been four cardiac arrests in the vaccine group but only one in the placebo group.

Next, Dr Malhotra assessed the 95% efficacy claims. Whilst this relative risk reduction made good sales material, the true value of a treatment can only be established by looking at the absolute individual risk reduction. This turned out to be 0.84%, in other words, in a trial of 20,000 people (10,000 in the vaccine group and 10,000 in the placebo group), 4 people in the vaccine group and 88 people in the unvaccinated group would end up testing positive for Covid. Another way to express that is that you would need to vaccinate 119 people to prevent one positive test.

This absolute risk reduction figure (0.84%) is extremely important for doctors and patients to know but how many of them were told this when they received the shot? Transparent communication of risk and benefit of any intervention is a core principle of ethical evidence-based medical practice and informed consent.

The trials did not show statistically significant reductions in serious illness or mortality and in fact there were actually more deaths (19) in the vaccine group versus the placebo group (17). Furthermore, there were only nine severe cases of Covid in the placebo group, representing 0.04%. And this was in regions specifically chosen for their high prevalence of infection.

To find protection against death, then the 119 figure above (people vaccinated to prevent one positive test) must be multiplied by the number of infections that would lead to a single death in each age group. So, Dr Malhotra calculates his rate of death from Delta was 1 in 3,000 meaning the absolute risk reduction of the vaccine protecting

100 N. Kofa K4-12th
(928) 927-3773

him from death is (1 x 3000 x 119) 1 in 357,000.

Aseem also pointed out in a recent editorial by John Ioannidis in BMJ evidence-based medicine the inferred efficacy of the vaccine from non-randomised studies may be 'spurious', with bias being generated by 'pre-existing immunity, vaccination misclassification, exposure differences, testing, disease risk factor confounding, hospital admission decision, treatment use differences and death attribution'. What should be part of the shared decision-making informed consent discussion when any member of the public is considering taking the shot is something along these lines: Depending on your age, several hundreds or thousands of people like you would need to be injected in order to prevent one person from dying from the Delta variant of COVID-19 over a period of around three months. For those over 80s, this figure is at least 230, but it rises the younger you are, reaching at least 2,600 for people in their 50s, 10,000 for those in their 40s, and 93,000 for those between 18 and 29 years. For omicron, which has been shown to be 30% - 50% less lethal, meaning significantly more people would need to be vaccinated to prevent one death. How long any protection actually lasts for is unknown; boosters are currently being recommended after as short a period as 4 months in some countries.

But how many people have had a conversation that even approaches an explanation similar to that? This is before we get into the known, ***Continues on Page 17***

unknown and has yet to be fully quantified harms.

Harms

Concerns have been raised about trial participants being limited as to the type of adverse event they could report. Furthermore, hospitalized participants were withdrawn from the trial and not reported in the final results. To make matters even worse, after two months, the FDA allowed the placebo group to be unblinded and get vaccinated, completely removing any control group with which to assess adverse events. Dr Malhotra sticks with his field of expertise, cardiology and discusses one of the most common vaccine-induced harms, myocarditis. Whilst authorities say that myocarditis is more likely after infection than vaccination, other studies have shown the opposite. There is no evidence of myocarditis until vaccination began in 2021, a full year after millions of youngsters naturally caught Covid.

Although vaccine-induced myocarditis is not often fatal in young adults, MRI scans reveal that, of the ones admitted to hospital, approximately 80% have some degree of myocardial damage. It is like suffering a small heart attack and sustaining some – likely permanent – heart muscle injury. It is uncertain how this will play out in the longer-term, including if, and to what degree, it will increase the risk of poor quality of life or potentially more serious heart rhythm disturbances in the future.

The UK's Yellow Card reporting system is addressed and determined to be far from adequate to cope with a rapid roll out of a brand new product. 9.7 million doses were administered before the clotting

problems with AstraZeneca were detected. In Denmark, they detected the problem after only 150,000 doses.

Since the beginning of the vaccine roll-out, there have been almost 500,000 adverse events reported involving over 150,000 individuals. This shows around 1 in 120 suffer an adverse event that is beyond mild. This number is unprecedented and represents the same as the total number of reports received in the first 40 years of the Yellow Card system being active. The MMR vaccine reports around 1 in 4000 suffer an adverse event.

The paper also looks at VAERS in the US which has recorded over 24,000 deaths, 29% occurring within 48 hours of vaccination and 50% within two weeks. Before 2020 there were approximately 300 deaths recorded per year.

Of most concern is that these reporting systems are actually likely to be underestimated with one paper suggesting that only 1% of serious adverse events are ever reported to the FDA. Another analysis estimated that only 10% of serious adverse events were ever reported on the Yellow Card system. Moreover, these reporting systems will generally miss medium and long term harms as it is more difficult to attribute to vaccination.

According to ambulance service data, in 2021 there were an extra 20,000 (20% increase) cardiac arrest calls compared to 2019 and 14,000 more than 2020 in the UK. Similarly, a recent paper in Nature revealed a 25% increase in both acute coronary syndrome and cardiac arrest calls in the 16- to 39-year-old age groups significantly associated with administration with the first and second doses of the mRNA vaccines but no association with COVID-19 infection.

More harm than good? One has to raise the possibility that the excess cardiac arrests and continuing pressures on hospitals in

2021/2022 from non-COVID-19 admissions may all be signaling a non-COVID-19 health crisis exacerbated by interventions, which would of course also include lockdowns and/or vaccines. Given these observations, and reappraisal of the randomized controlled trial data of mRNA products, it seems difficult to argue that the vaccine roll-out has been net beneficial in all age groups.

Dr Malhotra concludes the first part by saying that whilst risks from vaccination remain constant, the benefits reduce over time as the virus becomes less virulent and variants are not targeted by outdated products. He recommends a pause and reappraisal of vaccination policies.

Pandemic of misinformation

In part 2, Dr Malhotra explores the pandemic of misinformed doctors and a misinformed and unwittingly harmed public.

According to one senior doctor in regular contact with England's Chief Medical Officer, Chris Whitty, most of his colleagues in leadership positions influencing health policy may not have been critically appraising the evidence and were instead relying on media stories on COVID-19 and the vaccines.

He says there are four key drivers and seven sins that are the root of medical misinformation:

* Drivers

- 1) Much published medical research is not reliable or is of uncertain reliability, offers no benefit to patients or is not useful for decision makers.
- 2) Most healthcare professionals are not aware of this problem.
- 3) Even if they are aware of this problem, most healthcare professionals lack the skills necessary to evaluate the reliability and usefulness of medical evidence.
- 4) Patients and families frequently lack relevant, accurate medical evidence and skilled guidance at the time of medical decision making

* Sins

- 1) Biased funding of research (that's research that's funded because it's likely to be profitable, not beneficial for patients)
- 2) Biased reporting in medical journals.
- 3) Biased reporting in the media.
- 4) Biased patient pamphlets.
- 5) Commercial conflicts of interest.
- 6) Defensive medicine.
- 7) An inability of doctors to understand and communicate health statistics.

There are six components essential to informed decision making:

- 1) description of the nature of the decision.
- 2) discussion of alternatives.
- 3) discussion of risks and benefits (in absolute terms.)
- 4) discussion of related uncertainties
- 5) assessment of the patient's understanding.
- 6) elicitation of the patient's preference.

If the administration of the vaccine did not adhere to these principles (which is likely widespread, consistent with historical evidence), then it is also a significant breach of General Medical Council duties of a doctor to 'give patients the information they want or need in a way that they can understand'.

The paper continues to look at institutional corruption and erosion of public trust, the failure of regulation, biased reporting in the media and censorship of legitimate scientific debate.

A hard hitting, yet sensible paper which should be read by everyone, especially doctors who lost their critical thinking skills over the last few years. Dr Malhotra is a regular on TV so will this be reported in the MSM...I doubt it.

All Along the Watchtower Would the Russian invasion of Ukraine be justified if it were for biodefense?

By: Robert W Malone MD, MS
RWMaloneMD.substack.com

Before I was de-platformed by Twitter for posting the famously accurate Canadian COVID Care Alliance video, before I was de-platformed by LinkedIn for the same reason, before the infamous Joe Rogan hit #1757 where I said the three little words “mass formation psychosis” that caused the Silicon Valley overlords to lose bladder control, many feared that I was “controlled opposition”. And for good reason.

I have spent most of my career deeply involved in the US Biodefense enterprise. I have worked closely with biodefense research teams at USAMRIID, DTRA, and MIT Lincoln Lab. I was once a business partner with a retired CIA officer who was deeply involved in the DoD biodefense enterprise, and I have co-published with another. I once worked for the Dynport Vaccine Company, which had the DoD contract for “advanced development” (basically, clinical testing) of virtually all biodefense medical countermeasures for the US Department of Defense. My father worked as a federal defense contractor all his life, as did my father in law. In my father’s case, it was mostly in high energy systems- including developing technologies for protection against the electromagnetic surge effects of “the bomb” as well as exploding

foil – the technology used to trigger “the bomb”. My father in-law ran the Raytheon special projects division – basically a CIA gadget and technology shop. Think “Q” from the James Bond series. This is a byzantine world that I have deep understanding of, and direct experience with for virtually my entire life. I lived by the mantra which all DC bureaucrats know – keep your head down, because if they cannot see you, they cannot shoot you.

But I never really allowed myself to confront the possibility that we might not be the good guys, the white hats. Until I experienced what we have all been through over the last two years. A government (or really multiple governments) that clearly believes that it is justified in disregarding fundamental principles of bioethics and the common rule. And like many others, once I saw that, it was like having backed into a light switch and suddenly the entire room was lit up, and I could never un-see what was revealed. Are we always the good guys? Or is this just more interchangeable Spy vs Spy, where ethics and roles are fungible and “situational”. A world in which there are no good guys, no white hats. Just a matter of media spin, perspective, and realpolitik. The world as envisioned by Henry Kissinger and Klaus Schwab.

And by the way, “biodefense” is big business. Yet more weapons of war.

Most of us that are not deep into the mass formation process at this point can see the coordinated pivot from legacy media pushing the COVID fear-porn to the same outlets pushing the “Putin crazy bad man - Zelenskyy good man” theme. But almost as soon as the shooting war started, a more nuanced and complex counter-narrative cropped up.

- * That is the deep ties between children of key Democratic party leaders and Ukrainian petroleum industry interests.
- * The USA-sponsored bioweapon research facilities located throughout Ukraine, including along the Russian border.
- * The legitimate Russian concerns about NATO efforts to geopolitically encircle Russia.
- * The issue of whether Zelenskyy is really just a western puppet, rather than being the populist leader that has been pitched to us.
- * The surreptitious hand of the World Economic Foundation meddling in all of this.

Things started looking a lot more complicated than just “Putin crazy bad man - Zelenskyy good man”.

I love to illustrate key points with stories based on personal experience. I have been told by people who would know (including Major General (ret.) Philip K. Russell, MD), that over many decades, the total expenditures of the US Government in developing biowarfare agents exceeded the money spent on thermonuclear weapons. A case can be made that modern understanding and technology relating molecular biology, microbiology, and virology is fundamentally a “civilian” byproduct of a massive investment in biowarfare tech by US, USSR,

and other governments.

The latest evolution of these technologies is that we appear to have the CCP of the People’s Republic of China, which seems to recognize no ethical boundaries, pushing the limits of the brave new world of “transhumanism”. Which in turn becomes a justification for western nations basically making the argument that “since they are doing it, we have to do it”. An increasingly sophisticated next generation of biological warfare. Where people become the weapons of choice for governments that give us no choice. For further on that, please see our prior Substack “Human Augmentation – The Dawn of a New Paradigm”.

Back to my story to illustrate just what we are up against here, as told by those I used to hang with (who may be inflating their self importance). The history that was relayed to me is that the real event which catalyzed the fall of the former Soviet Union was actually the development breakthrough of a binary (two part) bioweapon which could be delivered via an airborne route. So lethal was this weapon, that it could basically stop tank commanders and their crews in their tracks. According to this version of reality, the major military tension and strategic concern between the former USSR and Western Europe involved Russian Tank battalions which were poised to be able to blitzkrieg all the way to the English Channel. A threat which the western European states were acutely aware of, consequent to Hitler having successfully deployed the same strategy. The west basically had no way to mitigate this threat, or so the

The Money Matrix Part 3: Education (1892-1914)

By: Sue Peters
infostation1.net

“When a commercial bank makes a loan contract with a borrower, the bank CREATES the deposit in the borrower’s account.” This is the “money power.” Have you repeated this fact 15,000 times yet? Banks CREATE

what we use as money! Those who control this ‘money power,’ have slowly changed the education of our children. This article will be the first of three on “The Money Matrix and Education” to trace the change chronologically from 1892 to today. The financial powers such as Rockefeller and Carnegie, through such legal vehicles as tax-exempt foundations, would slowly redefine American education. The goal? Control our society by controlling American education.

The Nature of the Human and Education

Back then, education was understood to mean “the drawing out of a person’s innate talents and abilities by imparting the knowledge of languages, scientific reasoning, history, literature, rhetoric, etc.” The true nature of humans was (and is) the uniqueness of the individual, represented by their unique life experiences. Humans seek to grow through creativity, satisfaction of genuine needs, feelings of curiosity, etc.

Contrast the above definition of humanness with the “new, dehumanizing definition used by the experimental psychologists” and slowly implemented into American education by the Rockefeller and Carnegie foundations. Learning is the result of modifiability in the paths of neural conduction. The situation/stimulus-response formula is adequate to cover learning of any sort, the individual will learn to respond to any given situation/stimulus, with the “correct’ response.

A human is a stimulus-response mechanism – that’s all.

1892 Removing Understanding of the Money System

The Working Men’s party of New York, formed in 1829, published: “That more than one hundred broken banks within a few years admonish the community to destroy banks altogether.” Lincoln’s Congress issued Greenbacks in the Civil War and led to more debate of the money question: who was to issue the nation’s money – the Congress or the private banks? Numerous third parties supported government issued money, such as the Greenback Party and Populist Party.

In 1892, the National Education Association (NEA) held conferences to decide what subjects should be taught in the increasing number of public secondary schools. The conference on ‘History, Civil Government, and Political Economy’ resolved unanimously the following, which was accepted by the NEA: Resolved, That formal instruction in political economy be omitted from the school program. The proposal was presented by Professor Woodrow Wilson of Princeton University. Wilson went on to become U.S. President and sign the Federal Reserve Bill, showing how ignorant (or manipulable) he himself was about the monetary system. As Edward Krug wrote in 1964: “This explains why public high schools in the United States raised generations of students who know and think nothing about money and monetary systems.”

1895-1904 The Corporate Trusts

When McKinley took office... the middle class looked on impotently while factories, railroads, gas and electric plants, street railway lines, telephone systems and mines were converted from a state of individual or mere corporate ownership into the trust form, owned by great single corporations. The amalgamations were helped, and in some cases instigated, by Wall Street investment banks. The investment banks worked together in syndicates (networks) offering stocks and bonds on the exchanges. They bought the securities from the corporations at a low price, paying with bankmoney CREATED easily and cheaply from the banks they controlled. Then they sold these financial securities at a higher price, pocketing the profits between the syndicate members. The companies and individuals comprising this network were primarily agents of the Morgan and Rockefeller banking empires.

Creation of Tax-Exempt Foundations

The massing of so much control and wealth by these financial oligarchs was challenged by the plans for a federal income tax – finally, passed by Congress in 1913. The oligarchs’ solution was the creation of tax-exempt ‘charitable’ foundations, with no end to their corporate existence. Using these funds, the oligarchs could ensure permanent control of the society, such as permanent ‘charitable’ control over educational policies.

Throughout the 20th century, there have been Congressional investigations highly critical of these tax-exempt foundations, but no solution of how to control them has ever been accepted. In 2010, a master’s thesis by Ryan Kapchinsky ended with these words: “This preservation of their wealth and power has enabled these families to become a ruling plutocracy within society.” In the first years of the 20th century, three private foundations were given charters by Congress, granting a self-perpetuating board of trustees and exemption from federal taxation:

* **1903** Rockefeller’s General Education Board – “the promotion of education within the United States of America”

* **1904** Carnegie Institute of Washington – “to encourage, in the broadest and most liberal manner, investigation, research, and discovery, and the application of knowledge to the improvement of mankind”

* **1906** Carnegie Foundation for the Advancement of Teaching – “do and perform all things necessary to encourage, uphold, and dignify the profession of the teacher and the cause of higher education”

* **1913** Rockefeller Foundation – “to promote the well-being of mankind throughout the world” -The Rockefeller Foundation was not successful in seeking a federal charter, due to increasing hostility from Congress, but got a New York State charter in 1913.

Expert Expects Insurance Companies to Take Legal Action Against COVID Vaccine Makers Over 'Early' and 'Unexpected' Deaths

By Michael Austin
www.WesternJournal.com

Insurance companies may be filing lawsuits against vaccine manufacturers in the near future. So says one of the country's top epidemiologists, Harvey Risch of Yale University.

Speaking with Just the News, Risch detailed exactly how and why such lawsuits may come about. According to Risch, insurers' actuaries overestimated life expectancies for those who took the vaccine. Because of this, the resulting "early unexpected mortality claims" have given insurers "a major financial risk that they have to figure out how to manage." One method for managing

those losses is through lawsuits. Risch claims that actuaries' misestimates have been largely based on a misinterpretation of "all-cause mortality," which is the death rate for a population in a given time frame from all causes of death.

Do you think insurers should sue COVID manufacturers?

In order to support his claim that insurers would soon be taking action, Risch "pointed to statements by insurers that offer group life insurance." The first of these statements came from

OneAmerica CEO Scott Davison. He claimed that a "one-in-200-year catastrophe" had been caused by death rates rising to 40 percent, an "unheard of" level according to

him, Just the News reported. In addition, Davison noted that "most claims aren't filed as COVID-related deaths."

Another insurer pointed to by Risch was Lincoln National. The company paid out a reported 163 percent increase in death benefits in 2021, which happens to be the first year

that COVID vaccines were made available. It then went on to lose another \$41 million in operations costs in the first quarter of 2022.

The bulk of these losses was blamed on "non-pandemic-related morbidity, including unusual claims adjustments, and less favorable returns within the company's alternative investment portfolio," according to Just the News.

In other words, in the era of the COVID pandemic, many non-COVID deaths have occurred. In order to make up for this cost, insurers, rightly or wrongly, may be looking at the impact of COVID vaccines may or may not have had on the general public.

All Along the Watchtower story goes, so it was always hanging over any geopolitical tensions which would arise from time to time between the European NATO states and the USSR. Apparently the binary biologic was so potent that it would kill or incapacitate the tank crews so quickly that it negated the risk of blitzkrieg. Of course, this is just one story, told to me by friends in high places - so unverified. Be that as it may.

The point is that biological warfare agents are potent, cheap, easy to manufacture (particularly compared to thermonuclear devices), readily deployed, and have changed the tide of history on many occasions.

Back to the "Indian" wars, where smallpox was basically weaponized from time to time against indigenous peoples in North America. And probably all the way back through recorded history. So now we have the emerging rich documentation of US sponsored bio labs scattered across what had increasingly become the US client state called Ukraine.

If you want to dip your toe into that topic, dive down that rabbit hole, please see the following:
"EXCLUSIVE: Deleted Web Pages Show Obama Led an Effort To Build a Ukraine-Based BioLab Handling 'Especially Dangerous Pathogens'"
"BREAKING: Biden official says US working with Ukraine to prevent

bio research facilities from falling into Russian hands"
"US Embassy Quietly Deletes All Ukraine Bioweapons Lab Documents Online-Media Blackout"
"China urges U.S. to release details of bio-labs in Ukraine"
"China urges US to reveal details of US-backed biological labs in Ukraine - including types of viruses stored"
"Russia Negotiator Charges It Now Has Evidence of 'Biological Weapons Components' in Ukraine That Show 'Good Reason' for Invasion"
"WHAT HAVE FAUCI'S FRIENDS BEEN UP TO IN UKRAINE?"

Here's the point. Once upon a time, the US engaged in thermonuclear

war brinkmanship with the USSR because of Russian missiles being placed on Cuban soil. The weapons of war have evolved. Bioweapons technologies have matured. What would the USA do if Russia was transforming Mexico into a client state and had placed biowarfare research laboratories along our southern border. Would we invade? I strongly suspect so.

Are "we" the good guys or the bad guys here?

Or is this just more Spy vs Spy, with a strong dose of fearporn administered to the general populace by the legacy media to ensure that we "think" and behave as the Overlords desire us to.

Death by “Tolerance” - How the Leftists are Destroying Our Nation from the Inside!

By: Steven Maikoski

Back in the early 1970's the Friars Club roasted Don Rickles at a stag luncheon. I know this because a friend of mine had a pirated cassette recording of the event, which was filled with some of the dirtiest, nastiest jokes and insults I had ever heard out of the Hollywood crowd. They were so bad that Rickles' retort was weak by comparison, he should have worn a clergy collar during his delivery.

In that luncheon, one famous late-night TV host claimed that although Rickles had a mean comedy act, he was actually a very friendly guy, because “queers need friends.” The audience howled with laughter at that line, but today our society would be offended by such a joke and the comedian would immediately incur the wrath of teams of civil rights lawyers, NY Times reporters and Karens.

We used to joke about our differences in sexual preferences, race, religion and nationalities; “Blazing Saddles” covered every base in those matters in just one movie. But now all have become weapons of division in our society. Why did this happen?

Some power players, empowered by civil rights attorneys and organizations, wanted to gain influence and make money by constantly being offended and enforcing new principles of behavior onto our society, strangely, under the name of tolerance. The new tolerance was intolerant of the old morals of

society. I call this a march of intolerance masquerading as tolerance.

By the way, these new civil rights are nothing more than demands of privilege. One of the arguments against the bill of rights is that it would provide a platform for people to claim rights that were never granted in our Constitution. There you are.

Religion became an immediate target, especially with its rich televangelists and their own moral failings. The new tolerance mob used the Danbury Baptists letter, written by Thomas Jefferson, that cited a “wall of separation of church and state,” to drive any reference to religion out of government. That would remove morality as well.

There is more separation between Thomas Jefferson and our Constitution than there is between it and churches. Please understand that Thomas Jefferson was not a writer of our Constitution; he was our ambassador to France during the summer of 1787. His letter, and the separation of church and state, is not part of our Constitution. Moreover, the First Amendment is clear on religion: “Congress shall make no law respecting an establishment of religion, or prohibiting the free exercise thereof; or abridging the freedom of speech, or of the press; or the right of the people peaceably to assemble, and to petition the Government for a redress of grievances.”

See that part about no law prohibiting the free exercise of religion? It is ignored, isn't it?

The new tolerance mob has an effective tactic of softening its wording to creep into moral society. Homosexuality has become gay; Transvestite is now

QSCA
ROADRUNNERS

100 N. Kofa
(928) 927-3773

drag; adult entertainment is now just entertainment—how else can you get to the children? Also notice that the new tolerance movement characterizes those who disagree with their campaigns of homosexuality as mentally ill, homophobes and bigots are the words they use.

The new tolerance mob's actions, especially their publicity campaigns, are purposefully designed to decrease the morality in our society. That is not a good thing, because any government that has an input from the people depends on their morality to keep the government from descending into a corrupt, perverted machine. As Founding Father John Adams wrote: “Our government was made only for a moral and religious people. It is wholly inadequate to the government of any other.”

There is a great reason to fight the new tolerance mob's encroachments into the moral character of our nation. Although their claims of tolerance and civil rights are backed up by a powerful legal and publicity apparatus, the pitfall of such public activities should be identified as the danger that it brings to our nation. Some things should not be promoted, especially with our children.

[Steven Maikoski's book “The Real Constitution, and its real enemies” is for sale on Amazon and at Ken's Grocery Outlets and The Main Event in Quartzsite. Worth every penny.]

This is the ONLY BOOK that properly addresses the twisted dialogue used by the leftists!

All 5-Star Ratings!
★★★★★ 5 out of 5

Look through all the books in politics today. Written by rich newsmen and politicians, they offer lessons on our history and issue complaints, but they never focus on the real problem and offer a solution. This unique book does both in less than 100 pages.

The Democrats are fundamentally transforming our nation by using a plan that is so clever that the conservatives do not realize their compliance with the poisonous design. This must be stopped!

“The Real Constitution and Its Real Enemies” explains the problem, educates, then offers an intelligent solution to this major problem. To save our republic we need to change the narrative!

The Real Constitution is available on Amazon.com *- therealconstitution.com

This Would Be A Wise Stopping Point For This War

By: Caitlin Johnstone
CaitlinJohnstone.com

At the risk of upsetting the entire internet, the annexation of those four Ukrainian territories seems like a great time to end this war to me. Does anyone honestly believe a significant percentage of the people who live there want a massive counteroffensive on their doorstep? I don't.

The west knowingly provoked this war, the thing experts warned for years would happen did happen, and now Ukraine lost some territory. Rather than risking millions or billions of lives escalating this conflict, it seems sensible to draw a line under it. You can yell "Putin bad!" and "International law!" all you want, but it's just a cold hard fact that after the annexation the US/NATO/Ukraine tandem is going to be presented with the choice of

either ending the bloodshed or massively, massively escalating it. Pretty easy choice, in my opinion.

There are two kinds of people who want peace in Ukraine: those who want it to come now via diplomacy, negotiation and compromise, and those who want it to come years from now after pouring millions of lives into driving Russia out of every last inch of Ukraine's pre-2014 borders. You either support a

negotiated settlement right now or you support an extremely long, protracted proxy war that risks nuclear annihilation, ends up costing millions of lives and trillions of dollars, and has no guarantee of success. And the latter position is what's being planned for.

Of course

I don't actually believe the fighting will end in this way at this time; there's too much riding on keeping the bloodshed going. I'm just highlighting the fairly obvious fact that it could end now, and should end now.

So far the strongest arguments I've seen that Russia destroyed its own pipelines essentially boil down to "Putin is CRAAAZY! Who knows why that wacky guy does what he does? He's bonkers!"

"Of COURSE Russia would destroy its own energy infrastructure and hundreds of millions of dollars in natural gas against its own interests and in direct facilitation of longstanding US unipolarist agendas! He's nuts! He's CRAAAZY!" Science should really start taking a closer look at this unspecified mental illness which only affects geopolitical foes of the US empire.

If we really believe Putin is so crazy and irrational that he's begun exploding Russian pipelines and shelling Russia-controlled power plants, the strategy should logically be to simply stand back and let him bomb Russia back to the Stone Age.

A think tank is an institution wherein academics are paid by the worst people in the world to convince everyone that good things are bad and bad things are good.

To want a healthy world is to want what the ego sees as a boring world: peace, collaboration and harmony instead of conflict, competition and drama. The fact that egos can't be content without conflict and drama means humanity must transcend egoic consciousness to become healthy.

Our movies, shows and stories all revolve around conflict and drama because most of humanity is enslaved by egoic consciousness, and conflict and drama are what egos find appealing. We're going to have to change that about ourselves to be able to live in a healthy world.

If we remain in the same egoic patterning it wouldn't matter if someone used a genie wish to make the world harmonious and egalitarian today, because we'd just ruin it immediately and return to our old modes of dysfunction. A healthy world can't exist without a conscious humanity.

We're going to have to change, and we're going to have to change in all the ways that are least appealing to the ego. It's a hard sell. But it's also an existential necessity, because we're going to wipe ourselves out if we don't.
