## A New Year's Resolution: Let's Get the United States Out of the Censorship Business

by: Jonathan Turley 12/31/24  
JonathanTurley.org

On New Year's Eve, billions of people gathered with friends to ring in 2025 with the hope of a better year to come. For the first time in many years, free-speech advocates have a reason to celebrate.

Along with 2024, we will say goodbye to one of the most reviled offices in the Biden Administration: The Global Engagement Center (GEC). I discuss the Center in my recent book, *The Indispensable Right: Free Speech in an Age of Rage* as one of the most active components in the massive censorship system funded by the Biden Administration. The demise of the GEC is a good start. However, like weight loss resolutions, it will take much more of a commitment if we are going to restore free speech in the United States. It is time to make the ultimate resolution to rip out the censorship root and stem from our government.

This month, the Biden Administration fought to keep the GEC funded, but Republicans refused to include it in the continuing resolution for the budget. However, even with the closure of this one office, Biden will leave behind the most comprehensive censorship system in the history of the United States.

Over the last three years, many of us have detailed a comprehensive system of grants to academic and third party organizations to create blacklists or to pressure advertisers to withdraw support for targeted sites. The subjects for censorship ranged from election fraud to social

justice to climate change.

I testified at the first hearing by the special committee investigating the censorship system funded or coordinated by the Biden Administration. It is an unprecedented alliance of corporate, government, and academic groups against free speech in the United States. The Biden Administration established the most anti-free speech record since the Adams Administration. House investigations showed the critical role played by government officials in "switchboarding," or channeling demands for removal or bans in social media. Officials evaded the limits of the First Amendment by using these groups as surrogates for censorship.

Even with the elimination of the GEC, other offices remain in various agencies, including the Cybersecurity and Infrastructure Security Agency (CISA) in the Department of Homeland Security, which emerged as one of the critical control centers in this system. CISA head Jen Easterly declared that her agency's mandate over critical infrastructure would be extended to include "our cognitive infrastructure." That includes not just "disin-

formation" and "misinformation," but combating "malinformation" – described as information "based on fact, but used out of context to mislead, harm, or manipulate."

These groups form a censorship consortium where the suppression of speech attracts millions in federal dollars. Election Integrity Partnership (EIP) was created in association with Stanford University "at the request of DHS/CISA." EIP supplied a "centralized reporting system" to process what were known as "Jira tickets" targeting unacceptable views. It would include not only politicians but commentators and pundits as well as the satirical site The Babylon Bee.

Stanford's Virality Project pushed to censor even true facts since "true stories ... could fuel hesitancy" over taking the vaccine or other measures. Emails show government officials stressing that they could not be seen as "openly endors[ing]" censorship while other groups sought to minimize public scrutiny of their work. For example, one article featured the work of Kate Starbird, director and

### Letter from the Editor

by: Leesa Bolden, LAC  
TFPP Editor in Chief

Thank God, we made it to 2025. Many of us have made our New Year's Resolutions and many will be broken. I tend to focus on being a better person and doing more good in the World. This year I will also focus more on my own health and setting healthy boundaries (beginning with adding B17 into my diet, learn why on page 9.) As we set our minds to our resolutions, remember that thoughts become things, so be careful to mind your thoughts. Whether you are right or you are wrong - if you believe it - you are correct. Believe in yourself and make a positive change in your life and others. Don't hope, choose every day to have a better life and you will. Most people are not afraid to die but MANY are afraid to LIVE.

The tide has certainly shifted. President Trump is about to be inaugurated and God willing, the healing

will begin. RFK will begin making America healthy again. Elon and Vivek will begin slashing Government spending to make America profitable again. Trump will begin to make America respected again. To make America great again, we will have to hold their feet to the fire. No more poisoning our food, water, medicine and our skies. No more wasting our tax dollars. No more creating endless wars by funding both sides. No more ruling class of pedophiles. No more putting our heads in the sand. We must all take part in the future of our World if we wish to live peacefully in it. God Bless America! God Bless the World! God Bless You!

Here in Quartzsite we are in our most exciting months of the year. If you are 'bored' in this area January through March, you are choosing to be. There is an event (or 5 and most are free) nearly every day. We have listed many of them in the events section on Page 11.

I want to encourage all of you to get more involved politically to

have a better understanding of how we got here and what is needed to correct our course and steer the ship in a better direction. Your future depends on you and the Globalist / Marxist will never stop trying to destroy it. We must get the United States out of the United Nations and NATO. IF you don't understand why, join your local John Birch Society chapter. Look for your's at JBS.org. They have been spot on for longer than most of you have been alive. Our local chapter is growing, contact Dave at (530) 260-3332 for details.

I hope you enjoy this edition of The Patriots Free Press.

We have a free section of bonus articles, videos and back issues so you can learn more about the Globalist agenda and political Shenanigans.

Advertise with us or become an Angel Investor with a one time or recurring donation, monthly or annually to help us

to grow, defend the 1st Amendment and share information from the other side of the narrative. We welcome evidence based rebuttals, constructive criticism as well as letters to the editor. Please don't take it personally if I don't publish it. Write or call to let us know what you liked, what you didn't and why, and please let us know what you want to see more of.

## Johns Hopkins University confirms: The PCR test alone will vaccinate you

by: Bruce Tanner 12/31/2024  
[substack.com/@beyondthesystem](http://substack.com/@beyondthesystem)

Journalist John O’Sullivan warned that the massive PCR testing campaign could be a WHO vaccination program in disguise.

He was referring to a new technology developed at Johns Hopkins University that developed tiny, star-shaped micro-devices called ‘Theragrippers’ that attach to the intestinal mucosa and can deliver drugs into the body. The devices are made of metal and a thin film that changes shape and are as small as a dust particle.

According to Johns Hopkins University, Theragrippers are administered with a cotton swab, similar to PCR tests. In October 2020, a Johns Hopkins University research team published positive results from an animal study confirming that the new technology works flawlessly.

In her article, Jan Walter describes (with extensive source citations) which techniques are possible to still vaccinate the population, when people are becoming increasingly critical

of vaccinations. This is only fueled by the continuing pressure for mass “vaccination” against a non-lethal disease for 99.8% of people with a new type of “vaccine” that is actually gene therapy by means of mRNA. It seems like science fiction and is chilling, but the methods and techniques are available. The question is how far do we let it get?

### Vaccinations increasingly scrutinized and the chilling alternative

In January 2019, WHO defined the growing number of vaccine critics as one of the ten greatest threats to global health, and since the unprecedented corona vaccination fiasco, the number of vaccine refusers has really multiplied. Meanwhile, resistance is emerging even within the conventional medical community, but the masterminds at WHO continue to insist on an unrealistic vaccination rate of at least 70 percent.

Now several experts and former mainstream journalists like John O’Sullivan are warning that the

October 28, 2020, confirming that the new technology works flawlessly: Here we report that GI parasite-in-

spired active mechanochemical therapeutic grabs (or theragrippers) can survive 24 hours in the gastrointestinal tract of live animals by autonomously adhering to mucosal tissue.

We also observe a remarkable six-fold increase in elimination half-life when using ripper-mediated delivery of the model analgesic

ketorolac tromethamine. These results provide excellent evidence that shape-shifting and self-locking microdevices improve the effectiveness of long-term drug delivery.

Coincidentally, the PCR test in China is now also performed anally because the reliability of the results is said to be better and of course this practice is immediately supported in the Western mainstream media.

**Note:** If you can’t imagine the government administering toxins to you against your will and without your consent, think of all the horrific experiments on humans that were admitted after the fact and which, according to Wikipedia, have continued well into modern times. In 2007, the CDC even admitted that between 1955 and 1963, 10-30 million citizens were infected with the carcinogen SV40 via polio vaccination.

### The Vaccination that is Not a Vaccination, but Gene Therapy

In a revealing video conference with Dr. Judy Mikovits, Robert Kennedy Jr. and Dr. David Martin, it is explained that the mRNA vaccine (by the legal definition) is not a vaccine at all. It is falsely called a vaccine to hide the fact that the purported vaccine is, in fact, a gene therapy.

[The full article and research is found at [NeedToKnow.news](http://NeedToKnow.news). As the globalists push more pandemics, keep this research in mind before agreeing to PCR testing.]

massive PCR testing campaign could be a WHO vaccination program in disguise. O’Sullivan is referring to a new technology developed at Johns Hopkins University that is supposed to make it possible to carry out covert vaccinations through a PCR test. Inspired by a parasitic worm that digs its sharp teeth into the intestines of its host, Johns Hopkins researchers have developed tiny, star-shaped micro-devices that attach to the intestinal mucosa and can deliver drugs into the body. These tiny devices, known as “Theragrippers,” are made of metal and a thin film that changes shape. They are covered with heat-sensitive kerosene wax and each no larger than a dust particle.

When the kerosene coating on the Theragripper reaches body temperature, the devices close autonomously and clamp onto the wall of the colon. Because of the sealing action, the tiny, six-pointed devices burrow into the mucosa and attach to the colon, where they are held and gradually release their drug load to the body. Eventually, the Theragripper lose their grip on the tissue and are removed from the colon through normal gastrointestinal muscle function.

**Note:** According to Johns Hopkins University, Theragrippers are actually administered with a cotton swab.

The Johns Hopkins University research team published positive results from an animal study as a cover article in Science Advances on

### Conspiracy Fact: IG Report Confirms FBI Had Dozens Of Informants In Jan 6 Crowd

by Tyler Durden  
12/12/2024  
ZeroHedge.com

Just in time for the Trump pardons, DOJ Inspector General Michael Horowitz revealed on Thursday that there were 26 ‘confidential human sources’ (CHSs) in Washington DC on Jan. 6, 2021.

a handling agent about planned travel to Washington. The other 23 informants had not been tasked by the FBI with traveling to Washington. Thirteen of this subset informed

their handling agent in advance of the trips, while the other 10 did not. None of the 23 were found to have engaged in illegal activity.”

While the presence of FBI informants on J6 was known, the exact number had never been confirmed. Because they were CHS’s and not badge-carrying Agent Smiths, Politico decided to run with this piece of absolute propaganda.

Of note, CHS’s have contributed to the prosecution of members of the Proud Boys and other people who were present on J6. According to Horowitz’s report, all but three of the informants were there “in connection with” the protest and other events that took place that day.

Four of the informants entered the Capitol, while 13 others entered restricted Capitol grounds despite not being authorized to do so. As the Epoch Times notes further, “Of the 26 sources who went to Washington in connection with the protest and other events, two were tasked to report on subjects whom the FBI had learned were traveling to the nation’s capital for the events. A third informant had been tasked with reporting on people traveling to Washington for the events after notifying

Some lawmakers noted that none of the informants who entered the Capitol or the restricted grounds have been prosecuted.

The U.S. Attorney’s Office for the District of Columbia, which has charged more than 1,500 people with crimes related to the breach, told the inspector general that the office “generally has not charged those individuals whose only crime on January 6, 2021 was to enter the restricted grounds surrounding the Capitol... and we have treated the CHSs consistent with this approach.”

The inspector general’s investigation was launched in 2021, but paused in 2022 to avoid conflict with ongoing criminal investigations and prosecutions. The probe resumed in 2023. By then, the inspector general’s office knew that multiple reports had been released on Jan. 6, and endeavored to focus on an area that it felt “has not yet been thoroughly reviewed by other entities.”

#### Other Findings

Horowitz said that the review found the FBI took significant and appropriate steps leading up to Jan. 6 to prepare for its role that day, which was a supporting capacity. The preparation included trying to identify known domestic terror subjects who planned to travel to Washington for the certification of electoral votes. After the Capitol was breached, the FBI was able to deploy agents to help clear the building and help the U.S. Capitol Police secure the perimeter. “We found that the FBI effectively carried out its tactical support function on January 6,” the report stated.

The inspector general’s office also concluded that the FBI should have canvassed field offices for intelligence from the confidential informants before Jan. 6. Such an action would have helped both the FBI and other agencies prepare for the day, the inspector general said. The report quoted Paul Abbate, the FBI’s deputy director at the time, as saying the lack of a canvass was a “basic step that was missed.”

In a letter dated Dec. 11, the FBI told the inspector general’s office that it disagrees with “certain of the factual assertions in the report regarding the manner of specific steps, and the scope of the canvass undertaken by the FBI in advance of January 6.” The agency agreed with the recommendation that the FBI look into the processes and procedures it uses to prepare for events that could involve domestic security issues.

Trump: We'll Be 'Acting Very Quickly' on Pardons For J6 Political Prisoners, J6 Committee Members 'Should Go to Jail'

by Jamie White 12/08/2024 InfoWars.com

President-elect Donald Trump said Sunday his incoming administration will be "acting very quickly" to issue pardons for the January 6 political prisoners and called for the House Jan. 6 committee members to be jailed.

In an interview with NBC's "Meet the Press" host Kristen Welker, Trump said he's looking to issue pardons for many of the J6 prisoners on his first day in office. "I'm going to look at everything. We're going to look at individual cases," Trump said. "Everyone?" Welker asked. "Yeah," Trump replied. "But I'm going to be acting very quickly." Welker asked, "Within your first 100 days? Your first day?" Trump responded, "First day. I'm looking

first day." "First day to issue these pardons?" Welker clarified.

Trump continued: "These people have been there, how long is it, three or four years," Trump said. "By the way, they've been in there for years, and they're in a filthy, disgusting place that shouldn't even be allowed to be open."

The majority of the J6 prisoners are being held at the Washington, D.C. Central Treatment Facility (CTF), where many have reportedly been languishing in inhumane prison

conditions.

The conditions are apparently so bad that at least 34 prisoners even signed a letter in 2022 pleading to be transferred to Guantanamo Bay, Cuba. Some of the J6 political prisoners, including Proud Boys leader Enrique Tarrio, Oath Keepers founder Stewart Rhodes, and veteran and former Infowars reporter Joe Biggs are currently serving 15 to 22-year prison sentences.

Trump's talk of pardons for J6 prisoners has come more into focus after Joe Biden issued a blanket pardon for his son Hunter last week absolving him of any federal crime he may have committed dating all the way back to January 2014.

Trump also said the Democrat-led House January 6 Committee members like Rep. Adam Schiff (D-Calif.) and former Rep. Liz Cheney

(R-Wis.) should "go to jail" for covering up and destroying evidence to advance their narrative that he led an insurrection on January 6, 2021.

His first network interview since he was elected in November, the president-elect discussed a wide range of topics, including his mass deportation plan, tariffs, his nominations, healthcare, NATO and foreign policy, the weaponized justice system, and more. [Watch the full interview at TFPnews.com]

January 6 Life Rebuilding Fund

The financial devastation that every January 6 Hostage & their families have undergone is a travesty. When hundreds of these patriot heroes emerge from Federal Prison after being pardoned - many of them will be HOMELESS & JOBLESS!!

The J6 Life Rebuilding Project is focusing on supplying these men with the necessities to resettle into society: First months rent, a cell phone, clothing and some groceries to hold them over until they begin working again.

We are connected with teams of volunteers who are ready to pick up the J6ers from each Federal Prison and help them get settled into their new apartments and restart their lives after 4 long years of torture and solitary confinement.

The travel costs are too high for many to afford, and we cannot allow our patriots to step out of prison with no money and nowhere to go!!

Please donate to our vital life rebuilding fund, which is operated by Jan 6 Political Prisoner Jake Lang & his team at J6Truth.org.

God bless you, we are eternally grateful for the love, support and prayers from our Conservative Christian community. We would be lost without you. Thank you from the bottom of our hearts.

- Jake Lang, Washington DC Jail Gulag

[Please make a donation if you value your freedom. We cannot give these patriots the life they have missed but we can help them rebuild it.

*\*Continued from Front Page\**

### *A New Year's Resolution*

co-founder of the University of Washington Center for an Informed Public. In one communication, Starbird cautioned against giving examples of disinformation to keep them from being used by critics, adding "since everything is politicized and disinformation inherently political, every example is bait."

Likewise, University of Michigan's James Park is shown pitching that school's WiseDex First Pitch program, promising that "our mis-information service helps policy makers on platforms who want to push responsibility for difficult judgments to someone outside the company by externalizing the difficult responsibility of censorship."

The system has layers of interconnected grants and systems. For example, the EIP worked with the Global Engagement Center that contracted with the Atlantic Council in censorship efforts. The censorship system included scoring groups through a grant from the National Endowment for Democracy (NED) to the British-based Global Disinformation Index (GDI). The index targeted ten conservative and libertarian sites as the most dangerous sources of disinformation, including sites like Reason which publishes conservative legal analysis. Conversely, some of the most liberal sites were ranked as the most trustworthy for advertisers.

The system is still in place, but on December 23, 2024, the GEC closed its doors. That is something to celebrate but not something to take as great comfort. This is a redundant and overlapping system created precisely to allow for such attrition.

Years ago, some of us wrote about the creation of the infamous Disinformation Governance Board at Homeland Security under its so-called "Disinformation

Nanny," Nina Jankowicz. When the Biden administration caved to public outcry and disbanded the Board, many celebrated. However, as I previously testified, the Biden Administration never told the public about a far larger censorship effort in other agencies, including an estimated 80 FBI agents secretly targeting citizens and groups for disinformation.

The system has functioned like a multi headed hydra where cutting off one head only allows two more to grow back. These censors will not simply walk away and become dentists or bartenders. They have a skill set for censorship and this is now a profitable industry supporting scores of people who now market themselves as "disinformation specialists."

Shutting down the GEC will eliminate a \$61 million budget and 120 employees. However, these employees will find ample opportunities not just in other agencies but in academia and state agencies. There are also pro-censorship sites like BlueSky, which are becoming safe spaces for liberals who do not want to be "triggered" by opposing views. Notably, BlueSky hired a former Twitter employee who was fired after Musk cleaned out at what is now X.

They are not going anywhere unless the Trump Administration and the Congress makes free speech a priority in eliminating each of these funding sources.

As I wrote in the book, we need to get the United States out of the censorship business by passing a law barring any federal funds for the use of censorship, including grants to academic and NGO groups.

Rooting out this censorship system will require a comprehensive effort by the new Trump Administration. So here is a resolution that I hope many in the Trump Administration will share: let's get the United States out of the censorship business in 2025.

## 17 Insane Benefits of Apricot Seeds: The Ultimate Source of Vitamin B17

by: John Richardson, Founder of Operation World Without Cancer and Richardson Nutritional Center [RNCstore.com/TPFP](http://RNCstore.com/TPFP)

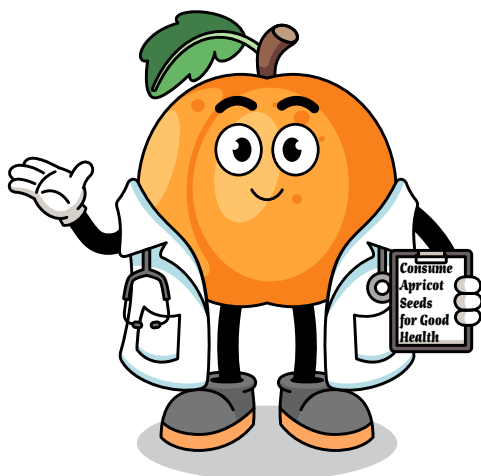

From cellular health to skincare, from inflammation to respiratory conditions, the Apricot Seed cannot be ignored. Apricot Seeds are jam-packed with beneficial nutrients from which nearly every person can reap rewards. Bitter Apricot Seeds contain the highest density of consumable B17 in a naturally occurring food. In addition to their potent B17 power, they also contain a multitude of additional nutrients that support health in diverse ways. Please take as directed.

### What is Vitamin B17 (Amygdalin/Laetrile)?

Vitamin B17, also referred to as Amygdalin or Laetrile, is a naturally occurring nutrient found in many nuts, seeds, and plants. B17 is most potently found in Apricot Seeds, but it also exists in apple seeds, spinach, lima beans, clover, sprouts, berries, eucalyptus leaves, and watercress, among many other healthy foods. Our bodies cannot naturally produce Vitamin B17. Therefore, to enjoy its benefits, we must consume it by eating specific foods or ingesting it in supplement form.

### How Can I Consume B17?

Bitter Apricot Seeds, also referred to as apricot kernels, are the most potent source of Vitamin B17 (Amygdalin/Laetrile) found in nature. In each Apricot Seed, there is on average 20 mg of B17. Some people, many of whom do not like the taste of bitter foods, prefer to consume B17 in capsule form. Both are effective ways to provide your body with the benefits

of Vitamin B17.

### 17 Insane Benefits of Apricot Seeds

1. Apricot Seeds are rich in fiber, which may play a major role in the function and health of digestive system organs.
2. Apricot Seeds contain high levels of Thiamine/B1 and Omega-3 fatty acids which some research shows may help lower blood pressure, improve circulation, lower heart rate, and maintain heart health.
3. Vitamin B17 may reduce the effects of inflammation by trapping acid and removing other toxins in the body. Some studies show that Apricot Seeds may even support extreme cases of inflammation like arthritis.
4. Apricot Seeds contain a considerable amount of the essential trace mineral Zinc. Studies show that consuming a healthy amount of Zinc per day may slow the progression of vision degradation and age-related macular degeneration.
5. Vitamin B17 may promote liver health and help reverse some of the effects of autoimmune hepatitis according to a study that indicated significant changes in healthy T-cell growth and a decline in disease.
6. Vitamin B17 may help boost immunity by slowing down the spread of illness throughout the body by killing harmful cells.
7. Studies have shown that Omega-3 fatty acids may increase resistance to reduce mood swings and other psychiatric disorders, as well as age-related mental decline and diseases such as Alzheimer's Disease.
8. Calcium is essential to bone health. The calcium found in Apricot Seeds contributes to bone health by helping to regenerate bone cells and increasing bone density.
9. Vitamin B17's inflammation-suppressing qualities from Zinc may dull the effect of ear pain, as well as help fight ear infections and disease.
10. Apricot seed oil is rich in essential fatty acids, Vitamins A and E, and can moisturize and nourish dry and mature skin.
11. Using B17-infused skincare products may help promote healthy, youthful skin and skin cell regeneration because of its immunity-boost-

- ing and anti-inflammatory properties.
12. Because Apricot Seeds are rich in protein, the consumption of 10 Apricot Seeds spread throughout the day can contribute up to 20-25% of the daily recommended amount of protein.
13. Apricot kernel oil used in hair care routines promotes moisture and may stop rapid hair loss. The essential fatty acids and Vitamin A and E may help heal dry scalp.
14. The iron and phosphorus in Apricot Seeds both assist in energy maintenance and fatigue reduction by promoting blood volume and oxygen levels.
15. Studies show that active ingredients in Apricot Seeds may act as expectorants to reduce respiratory issues.

16. Apricot Seeds contain a high content of phenols and alpha-tocopherol, a fat-soluble form of Vitamin E, which studies show may have antioxidant effects.
17. Vitamin B15 is also found in Apricot Seeds. Its claimed antioxidant property may increase oxygenation of the heart, brain, and other vital organs. It is often used to increase athletic performance and endurance.

## Honduran President Will Close U.S. Military Base If Trump Deports Honduran Illegals

by R. Cort Kirkwood 01/04/2025  
TheNewAmerican.com

Xiomara Castro, president of beggar-nation Honduras, says she'll shut down the U.S. military based in her poverty-stricken country if President-elect Donald Trump mass deports Honduran illegals back home.

Honduras, which collected almost \$200 million in foreign aid in fiscal 2023, is the second Latin American nation attempting to thwart what Trump has vowed will be the "largest domestic deportation operation in American history."

Mexico has prepared for a legal war against the administration. It has created a smartphone application with which deportable illegals can notify consulates and subversive lawyers about their cases.

### The Threat

Castro's message to her countrymen, many of whom might rely on revenue generated and employment by Soto Cano Air Base, was short and bitter. "We hope that the new U.S. administration of democratically elected President Donald Trump will be open to dialogue, constructive and friendly, and will not take unnecessary reprisals against our migrants, who normally make a great contribution to the U.S. economy," she said in Spanish: "Faced with a hostile attitude of mass expulsion of our brothers, we would have to consider a change in our policies of cooperation with the United States, especially in the military arena, where, without paying a cent for decades, they maintain military bases in our territory, which in this case would lose all reason to exist in Honduras."

Soto Cano is home to Joint Task Force Bravo, which comprises the 612th Air Base Squadron, Joint Staff, Army Forces Battalion, and the 1st Battalion of the 228th Aviation Regiment. It houses some 500 military personnel and 500 civilian employees.

"JTF-Bravo conducts a variety of missions in Central America, South America and the Caribbean that range from supporting U.S. Government operations, countering transnational organized crime, [and] humanitarian assistance/disaster relief missions to building partner capacities," its web-

site says. "The successful completion of these missions, with support from all units, allows JTF-Bravo to promote security throughout the region."

As of August, the base employed 80 foreign nationals, many (if not all) are Hondurans. About half have worked at the base for decades. One employee has worked there for all but three of the years since it was established in 1983.

Should Castro shut down the base, those employees would lose their jobs. Beyond that, Honduras is a welfare case. In fiscal 2023, it received \$194 million in foreign aid from the United States, and in fiscal 2022, \$204.7 million. For previous years: Fiscal 2021: \$222.1 million; Fiscal 2020: \$125.3 million; Fiscal 2019: \$71 million; Total since 2017: More than \$1 billion.

### Honduran Criminals

One reason Castro doesn't want the return of Hondurans (almost 600,000 of whom border agents have encountered at the southwest border since fiscal 2022) is a significant number are likely dangerous criminals, perhaps on the run from Honduran cops.

Unhappily enough, President Biden has released many of those illegals into the interior. One of those is 19-year-old Angel Matias Castellanos-Orellana, who, despite his high-sounding name, is not Honduran royalty. Rather, police allege that Castellanos-Orellana waged a 25-day terror campaign in Louisiana that include raping a 14-year-old girl and stabbing a 62-year-old man. After he was arrested, the House Judiciary Committee procured his illegal-immigration record from the Department of Homeland Security (DHS): On October 6, 2023, Angel Matias Castellanos-Orellana (a national of Honduras) was encountered by Border Patrol in Eagle Pass, Texas. Despite the fact that the alien "claim[ed] to have no fear of being returned to their native country," Castellanos-Orellana was released with a Notice to Appear in immigration court on an "Order of Release [on] own Recognizance" due to a "lack of space," with instructions to report to ICE Enforcement and Removal Operations (ERO) in

New Orleans on November 7, 2023. According to DHS's own data, however, the agency had capacity to detain Castellanos-Orellana before he was released. His criminal A-file also indicated that he had no criminal history.

Castellanos-Orellana isn't the only dangerous Honduran whom Biden released into the country. Another is Yery Noel Medina Ulloa, who was convicted in 2023 for the second-degree murder of a 46-year-old man in Florida. Biden freed him to kill after he provided a false name to border authorities. No wonder Castro doesn't want her countrymen back. Biden undoubtedly took thousands of such criminals off her hands.

### Mexico

Castro isn't alone in opposing Trump. Mexico is also begging for a fight. As The New American reported last week, Mexico's Foreign Secretary Juan Ramón de la Fuente announced the creation of a smartphone application that will enable Mexican illegals slated for deportation to get attorneys.

"I have personally attended several open meetings where the key message is to tell our fellow citizens that they are not alone and will not be alone,"

de la Fuente said. Axios reported: De la Fuente said Mexico's "Know Your Rights" program will be part of a rapid response to possible enforcement scenarios or "other intimidating actions."

Mexico's legal protection program includes 329 legal advisors at all 53 consulates in the U.S., along with voluntary support from consultants and law firms across the country, he said. Still, Mexico is preparing 25 shelters to house the deportees, a sign that the nation is taking Trump's threat of mass deportations seriously.

Trump has repeatedly said he will round up and deport the illegals in the country. He's promised to use local cops and the military if necessary to do it. That has invited vows of resistance from myriad localities, including Denver, Boston, and San Diego County. Denver's far-left mayor, Mike Johnston, said police and "50,000 Denverites" will block Immigration and Customs Enforcement agents from deporting illegals. Incoming border czar Thomas Homan has warned the officials to read the federal statute that forbids harboring illegals.

## Bogus Bird Flu

by: Joel Salatin 01/01/2025  
[www.TheLunaticFarmer.com](http://www.TheLunaticFarmer.com)

I just had a reach out from a guy planning to put pastured poultry on his family farm that currently raises cows and pigs but “mom” is concerned the chickens will invite bird flu which will then infect the pigs and cows. Here’s a young wanna-be farmer stymied by parental paranoia regarding bird flu.

Everyone needs to realize that the test being used to discover bird flu in milk tanks, dairy herds and elsewhere is the scientifically perfect credible authentic PCR test. Yes, the infamous PCR test. Remember false positives?

The PCR test is a mechanism to genetically amplify material to find floating pieces or particles of something. The inventor, of course, says it is bogus for finding viruses. It was developed for genetic discoveries, not for finding diseases. Someone smarter than I can tease out these differences, but suffice it to say it’s the wrong tool. You wouldn’t pick up a box end wrench to turn a Phillips head screw.

Second, even if it were the right tool,

it’s being applied incorrectly. Each cycle is like a microscope amplification. Remember turning microscope lenses from 35X to 100X? Each cycle of a PCR test amplifies magnification to find additional material floating in the sample. The official USDA and FDA number of cycles is 45. Massachusetts officials I think are the first state folks to say categorically that anything more than 30 cycles is bogus. How so? Because if you keep ramping up the amplification, smaller and smaller particles will show up. Any reasonable person knows our biological spaces are literally filled with floating molecular detritus.

Pieces of cells, pieces of DNA, pieces of Democrats and Republicans, with maybe a piece of Libertarian and Socialist thrown in –goodness, in the air around us, in our bodies, in our nasal passages, exist bits and pieces accumulated from everything, everyone, and everywhere.

Each of us has a Peanuts Pigpen-like cloud surrounding us, exhaling, inhaling, being

swarmed by immune function, excreted in snot, tears, poop, and pee. I’m reminded of the last major bird flu outbreak in our area of Virginia. One of the federal vets dispatched to the area told me, in person, “we came here to find bird flu, and by gum we’re going to find it.” That was 20 years ago. Think things have changed today?

I have no clue who or what is behind the curtain on this. It could be as nefarious as livestock extermination to keep burps and farts from turning us all into crispy critters; it could be as sincere and kind as wanting to protect us from sickness. Whether righteous or not, the agenda has the same outcome: paranoia from junk science.

If you did not take the covid-inducing jab, do you spend half your day worried you might catch covid? Do

you trust the Fauci-Collins covid narrative? Dear folks, bird flu is being hatched the same way from the same people and the same fraternity that blessed us with covid. Same boat crossing the same river.

What did we learn from covid? Just carry on. Don’t worry about it. Get in the sun. Stay active. Hug often. Serve with enthusiasm and purpose. Breathe. Be grateful. Eat whole foods. Don’t drink Coke or eat McDonald’s. Stop watching mainstream media. Realize that the debris field is not just biological, it’s political, religious, spiritual, emotional. Call it what it is: life and stuff, then carry on.

Don’t let the paranoia du jour suffocate your agenda in despair and depression. Laugh. Do. Carry on. If you’re as excited about healing people and the planet as I am, you won’t have time to collapse in a funk. We have too much to do to let worry dominate sacred healing missions. So let’s get to it, add chickens to your cows and pigs; they’ll be fine if we let them express their chickenness, cowness, and pigness.

Are you worried about the bird flu? Don’t be.

## Stop Spraying Us with Aerosolized Pandemics!

*Pandemics are caused by aerosolized bioweapons, including H5N1. Dr. Demetri Daskalakis stated on CNN 2 days ago that there is no evidence of human-to-human transmission of H5N1 bird flu.*

by: Karen Kingston 01/02/2025  
[substack.com/@karenkingston](mailto:substack.com/@karenkingston)

With the recent increase in chemtrail skies, the emergence of unmanned, low-orbit drones spraying local communities across America, and the emergence of a mysterious fog across Europe and North America, the 2021-22 breaking news that COVID-19 was an aerosolized bioweapon attack is now "breaking news" again.

Over the past 4 years, I've frequently reported that there was no human-to-human transmission of SARS-CoV-2, but that the COVID-19 pandemic was caused by aerosolized biosynthetic proteins encapsulated in lipid nanoparticles during interviews with Brannon Howse.

### **Pandemic "Viruses" are Biosynthetic Nanotechnology Bioweapons**

In 2023, the producers of Died Suddenly and I even made a movie entitled, "Final Days," detailing the patents, EcoHealth Alliance DARPA proposal, and statements from James Giordano (DARPA contractor) explaining how militaries can aerosolize nanoparticle technologies to cause illness, disease and death in the population, as well as induce neurocognitive dysfunction (aka - the nanoparticles are also neuroweapons).

### **Is H5N1 an Aerosolized Bioweapon Pandemic?**

Yes. H5N1 is also a nanoparticle lab-created pathogen created and funded by NIH/DARPA/DoD/BARDA that is currently inoculating mammals around the globe, specifically targeting dairy cows and chickens, through aerosol attacks, as well as contaminated food and/or water.

On October 10, 2024, members of the WHO, FDA, CDC, NIH, ASPR, BARDA, as well as U.S. infectious disease pediatricians, held a 6.5 hour meeting to discuss the current status and further development

of vaccines for an emerging 2024-2025 H5N1 global flu pandemic. During the meeting, representatives, including Dr. Paul Offit, talked about how the dangerous subclass of H5N1 hasn't jumped from animals to humans 'yet'.

Presenting data from the WHO, Dr. Todd Davis of the CDC gave a 1-hour presentation on the "Highly Pathogenic Avian Influenza A (H5NX) Virus Surveillance and Characterization in the US and Globally and Recommendations for Candidate Vaccine Virus Development."

### **H5N1 Causes Asymptomatic Infections in Dairy Cows and Chickens**

Similar to the stories from the NIH, NIAID, USAID and EcoHealth Alliance about the SARS-CoV-2 virus jumping across various animal species and eventually to humans, Dr. Todd Davis' presentation was highly focused on the 'unscientific story' about inert genetic material from birds (H5NX) spontaneously jumping from birds to all different types of species and eventually crossing over humans, thereby causing a highly infectious disease-causing and deadly pandemic.

This is all nonsense. 'Viruses' (aka proteins, aka genetic material that is foreign to a species) doesn't spontaneously mutate and jump from one species to another. In other words, you have zero risk of contracting dog DNA from petting your dog. Cells in your body won't spontaneously be penetrated by a 'dog virus' (aka dog DNA/RNA proteins) and then begin producing dog DNA in your body making you an infectious carrier of dog DNA.

During the October 10th Mega WEF/FDA meeting, the co-conspirators completely left out the discussion of the vector (vehicle or delivery mechanism) that is required to for a human to be inoculated with innate genetic material (aka a virus) foreign to our

species, which would be an insect (such as a mosquito) or a vaccine. At least with COVID-19, DARPA based their original COVID-19 pandemic story in some realism alleging a mosquito as a potential vector.

Even if someone is infected with foreign genetic material via a bug bite or if they got bird or bat poop in their eyes or mouth, they still would

not be able to infect other human beings with the alleged zoonic 'virus,' despite what Deborah Birx recently said on CNN.

The Bird-DNA-Based H5N1 Virus is Not transmitted via Human-to Human Contact. Don't believe me? Even the CDC's infectious disease specialist, Dr. Demetri Daskalakis stated on CNN 2 days ago that there is no evidence of human-to-human transmission of H5N1 bird flu. Dr. Daskalakis stated, "To be clear, there is no evidence of human-to-human transmission in the United States." Therefore, CA Governor Gavin Newsom's declaration that H5N1 is public health emergency has no factual basis but is based on fraudulent statements. On November 7, 2024, Dr. Daskalakis also stated during a CDC weekly meeting, that the most common symptom of the 'highly-deadly' bird flu in livestock and humans is no symptoms at all or very mild symptoms (meaning....the potential for H5N1 to become a pandemic is a made-up story).

So, if there is no human-to-human transmission of H5N1 and the most common symptoms of sickness are no symptoms at all... "How Do Humans Get Infected and SICK with Disease-Causing Nanoparticle Encapsulated Biosynthetic 'Viruses' such as SARS-2 or H5N1?" US Marine Jason Murphy exposed in a whistleblower letter that the COVID-19 injections were the ultimate vector turning human beings into 'bioweapon factories.' I reported on Jason Murphy's whistleblower documents on January 17, 2022, on WorldViewTube with Brannon Howse.

FDA vaccine director, Dr. Jerry Weir stated on October 10, 2024 that the FDA plans on fully approving pathogenic (disease-causing) H5N1-virus vaccines for use in Americans and global citizens as young as 6 months old without reviewing any safety or efficacy data first.

**Pandemics are the Business of BioWarfare**  
Former Russian Biodefense General, Igor Kirillov, (who was recently assassinated), frequently reported that WHO declared pandemics were created by 'biosynthetic pathogens' for the purposes of

### Stop Spraying Us w/ Pandemics

releasing high-risk, disease-causing vaccines made by US manufacturers, for the purpose of monetary gain. Per a May 6, 2023, Russian Press Statement: "Due to purely opportunistic reasons, during the years of the pandemic, the issue of WHO registration of domestic vaccines that have (claimed) proven effectiveness and saved millions of lives in various countries of the world has not been resolved. At the same time, facts of world-scale corruption around American pharmaceutical companies who saturate national markets with their vaccine preparations have been increasingly revealed recently. Now that we have overcome the acute phase of the crisis, the issues of the global post-COVID recovery remains relevant, in particular its socio-economic dimension.

This will require even greater cohesion from the countries, the rejection of the narrowly selfish interests of individual groups of states seeking to consolidate global inequality. Russia is ready to provide assistance and cooperate with all countries on the principles of solidarity, equality and respect for international law in the search for mutually acceptable solutions to enter the positive dynamics of sustainable development and expand international cooperation in the field of global health to prevent future pandemics."

### The NIH Has Invested Over \$1.5 Billion in H5N1

It's important to note that the NIH has invested over \$1.5 billion in developing H5N1 vaccines (and viruses) since 2006 and is financially invested in ensuring that the H5N1 vaccines gain global market access.

### What is the End Goal?

Per a 2022 interview with Dr. Robert Malone and Glenn Beck, the end goal is transhumanism. While transhumanism is often described as the merger of man with machine, in reality, it is the extinction of the human species and all biological life forms.

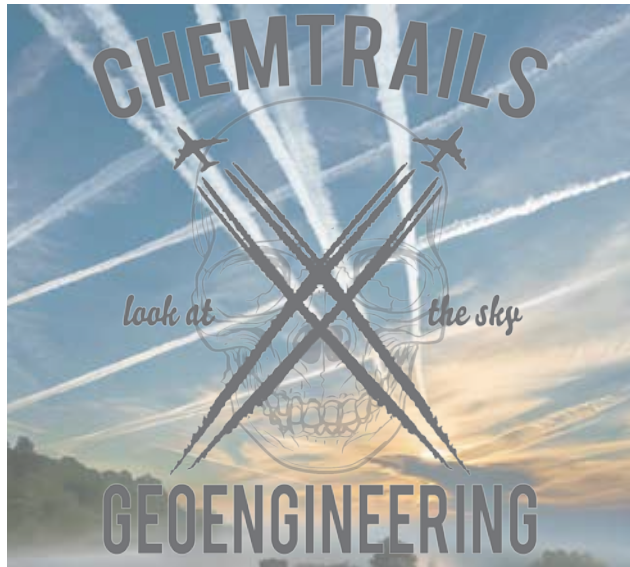

In a recently leaked presentation (allegedly from NASA) entitled, "Future Strategic Issues/Future Warfare (Circa 2025)," NASA presents a plan for

the extinction of humanity that includes the emergence of cyborgs and 'virtual humans.' Slide 2 is clearly titled, 'The Bots, Borgs, & Humans Welcome You to 2025 A.D.' This war on humanity is being coordinated by US national security agencies (i.e. FBI and CIA), as well as US military departments (i.e. US Air Force). The presentation describes humans as a type of pestilence on 'Spaceship Earth'. While this may be shocking to some, in Pfizer's mRNA partner's January 2021 investor presentation, BioNTech describes the human species as 'a disease.'

The end goal of global powers working together to exterminate the human species and upload 'human consciousness' to a cloud, is confirmed by the China National GeneBank educational video promoting the promise of 'everlasting life through

the reduction of human population and digitization of all life forms, to have human beings only exist 'virtually.'

*"And unless those days were shortened, no flesh would be saved; but for the elect's sake those days will be shortened." - Matthew 24:22*

### What Can We Do to Stop This?

The first step is to stop repeating the lies of the unelected overlords that are trying to control us, this includes dismantling the

made-up story that today's pandemics are caused by 'viruses,' when they're in fact, caused by military-grade nanoparticle bioweapons that are spread via aerosol attacks, and/or food and beverage contamination.

A health freedom attorney or law firm can act swiftly to file a restraining order against CA Governor Gavin Newsom for declaring an H5N1 state of emergency based on fraud. Attorneys and/or pro se litigants can bring criminal charges against Pfizer and have the PREP Act vacated (not repealed) because Congress cannot pass laws that override state criminal laws under Article 1, section 1 of the Constitution.

We can all petition the new administration, HHS and Congress to issue a Class 1 recall of the COVID-19 mRNA injections immediately after Trump takes office.

### We Should Be Praying for Each Other, Not Attacking One Another

I've recently observed much infighting amongst the medical freedom movement and IMO, this needs to stop immediately. We don't need a 'few good men,' we need an army of courageous individuals who are willing to sacrifice everything for the sake of our country, our liberties, our children, and our species. True warriors who can actually move the needle have been and will continue to be threatened, attacked, injured and terrorized in this war to save humanity. We should be praying for each other, not attacking one another.

I strongly recommend subscribing to Dr. Peter McCullough's Substack for verifiable updates on the origins, spread, and potential devastation of H5N1 if immediate actions are not taken.

### James 2: 20-26

*You foolish person, do you want evidence that faith without deeds is useless? Was not our father Abraham considered righteous for what he did when he offered his son Isaac on the altar? You see that his faith and his actions were working together, and his faith was made complete by what he did. And the scripture was fulfilled that says, "Abraham believed God, and it was credited to him as righteousness," and he was called God's friend. You see that a person is considered righteous by what they do and not by faith alone.*

*In the same way, was not even Rahab the prostitute considered righteous for what she did when she gave lodging to the spies and sent them off in a different direction? As the body without the spirit is dead, so faith without deeds is dead.*

## Wilhelm Reich's Cloud Buster and Climate Control

by: Subtle Energy Sciences Staff  
<https://Subtle.Energy>

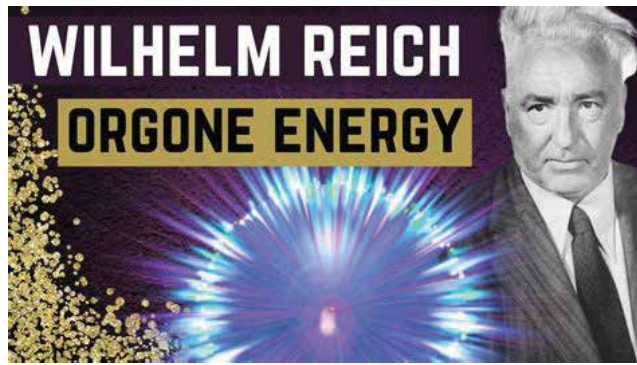

Do you think it's strange that weather reports are rarely accurate? One thing today's meteorologists don't account for is the presence of subtle energy within the atmosphere. If you think about it, subtle energy impacts the health of plants, animals, and humans; could it be influencing the weather of the planet, too? Wilhelm Reich, one of the biggest names in subtle energy science, went beyond the lab to test this weather phenomenon on a much larger scale.

"Positive results in ending severe droughts and wildfires, within a few weeks or even days, and returning natural cycles of rainfall, have been observed in field experiments undertaken in the USA and overseas, over many years."

- Dr. James deMeo

Theoretically, the presence of subtle energy in the atmosphere has a direct influence on cloud formation. When clouds form, they rely on the surface tension of water droplets to make them more stable and resistant to evaporation. As seen in our previous article, there are multiple points of evidence that indicate subtle energy has a direct influence on the surface tension of water. Because of this, concentrations of subtle energy, or the lack thereof, likely plays a key role in the weather patterns of our planet.

In his work, Reich suspects that orgone (his term for subtle energy) impacts our climate through its interaction with the levels of moisture in the air. Throughout his time researching the effects of subtle energy, Reich

invented multiple devices to harness its power as well. One of these inventions is known as the cloud buster. Built initially to channel excess subtle energy out of Reich's lab, it was found to have a greater application for its affects on the surrounding atmosphere.

Wilhelm Reich's cloudbuster actually works to channel subtle orgone energy into it, like a vacuum. When it is pointed at a sky full of clouds, the energy charge that was holding together the surface tension of the water in the cloud dissipates, causing the cloud to evaporate. No surface tension, no clouds – hence, the cloud is busted.

The device itself is constructed with hollow metal tubes, set on a gun mount so that they can be aimed at the sky. According to Reich, it must be connected through a grounding rod to a living source of water beneath the ground. An active well, or other source of "healthy" flowing water is needed for the cloud buster to work. Stagnant water will not conduct the proper energy flow, as the orgone from the living water plays a critical role in the equation of how this technology works.

Reich labels the living ground water as having higher orgone potential (OP). Therefore the negentropic

nature of the orgone within the cloud will begin to flow through the cloud buster, attracted almost magnetically, to the more powerful source flowing within the ground. Those who have stood near one of these devices report that a distinct change in atmosphere occurs, and a breeze begins to blow within a few minutes of the process.

Researcher, Dr. James deMeo investigated Reich's work further in the 70s through an indoor experiment. Using a different Reich device called an orgone chamber, a large box that allows for the accumulation of subtle orgone energy, he observed the impact various levels of orgone had on evaporated water. At higher concentrations of orgone, the water evaporation was slowed. This confirms the theory that orgone, or subtle energy, helps water to structure in such a way that inhibits evaporation.

Additionally, deMeo carried out a successful 2-year study on the cloudbuster at the University of Kansas

Geography-Meteorology Department, which he summarizes with this quote: "I studied the influence of the device upon the dynamics of cumulus clouds, making photographs which were then digitized and graphed on a computer, and also 12 different experiments to increase rains. The study incorporated weather data for the entire state of Kansas. The device was operated for only a few hours on the test days, and produced dramatic increases in the percentage of cloud cover and measured precipitation over the entire state, starting usually within an hour or two after the onset of operations."

DeMeo's results confirmed the findings of Reich and his contemporaries. Ultimately, these men see cloud busting technology as a form of atmospheric acupuncture. They see chronic drought regions such as deserts, as areas where the natural pulse of rain-dry-rain-dry has ceased to function. It could be possible, that by learning to harness the subtle energy within the atmosphere, we could have a better chance of bringing balance to the world's climate.

### LOST DOG!!!

REWARD!!! 928.916.1090

#### Dearly Loved Husky/GSD

She went missing Sunday, April 2, 2023 when she was briefly tied outside at 1498 W. Main St. in Qz.

Please help us find Misti! We desperately want her back!

There is a \$5000 Reward - NO questions asked - for her return or information leading to discovery

of her whereabouts. She is easy to identify! Black Nose, Brown eyes & a white tip on her tail.

## DMSO Safely Eliminates 'Incurable' Pain

by: A Midwestern Doctor  
www.midwesterndoctor.com

Decades of research have demonstrated DMSO treats a wide range of illnesses: Challenging neurological conditions (e.g., strokes, Down syndrome, dementia, brain and spinal cord injuries); Many autoimmune conditions; Eye, ear, nose, and mouth disorders; a myriad of skin disorders; tissue injuries; and disorders of the internal organs. DMSO is best known for its use in treating pain. It's response is rapid and dramatic. It accelerates the healing of acute and chronic injuries. It also helps chronic rheumatic diseases like arthritis.

### Why DMSO Stands Out

Drugs like NSAIDs and opioids are linked to severe side effects, including tens of thousands of deaths each year. NSAIDs cause heart, kidney, and stomach damage, while opioids carry addiction and overdose risks.

In contrast, DMSO has demonstrated remarkable safety for over 60 years without a single death reported. Its side effects, most commonly mild skin irritation or a garlic-like odor, are minor and temporary. Even at doses 30 times higher than normal, studies show no toxicity.

DMSO's unique combination of safety, efficacy, and versatility makes it a transformative option for pain relief and injury recovery — proving that effective medicine doesn't have to come with dangerous trade-offs.

### How DMSO Treats Pain

In addition to rapidly treating injuries or autoimmune conditions (which are

often the root cause of pain) DMSO has a few therapeutic properties that make it uniquely suited to safely treat a wide variety of pain conditions.

#### • Conduction blocking

Many different nerves exist in the body. One group, known as the "small fibers" are responsible for transmitting specific sensations and they (particularly the C fibers) are frequently linked to debilitating chronic pain syndromes (e.g., small fiber neuropathy — characterized by sensations of pins-and-needles, pricks, tingling, and numbness alongside burning pain and electrical shocks). DMSO selectively blocks the conduction of the small fibers, thereby stopping the pain without

causing significant damage to the rest of the body or having a tolerance develop to it (rather

DMSO typically becomes more effective with time).

• **Choline esterase inhibition** Acetylcholinesterase inhibitors increase acetylcholine (the neurotransmitter of the parasympathetic nervous system) by blocking their degradation. Numerous studies show DMSO is an effective acetylcholine esterase inhibitor and that it blocks the inhibitory effects of the sympathetic nervous system.

◦ Chronic pain has been linked to excessive sympathetic activity, and counterbalancing that with an acetylcholinesterase inhibitor has shown promise for treating chronic pain. However, unlike those drugs, DMSO does not have a risk of creating excessive acetylcholine levels (possibly

because at higher doses it instead blocks cholinergic transmission or because it is a competitive rather than irreversible inhibitor).

#### • Anti-inflammatory

Many of my colleagues who used DMSO in practice find it to be one of the most effective anti-inflammatory agents out there. DMSO in turn, has

been repeatedly shown to:

- Reduce inflammatory cytokines, prostaglandins, and pathologic inflammatory responses to tissue injury.
- Increase anti-inflammatory prostaglandins.
- Neutralize (scavenges) free radicals, which are both a cause and result of chronic inflammation and a common cause of tissue injury, degenerative illness, and chronic pain.
- Research also shows DMSO prevents experimentally induced edema, (including severe forms), allergic eczema, contact dermatitis, tissue necrosis, granuloma formation, arthritis, and joint stiffness following injury.
- Since inflammation is a key cause of pain (e.g., "chronic inflammatory pain" is well recognized), this likely accounts for some of DMSO's analgesic properties.

#### • Muscle relaxation

DMSO tends to relax skeletal muscle while simultaneously enhancing the contraction of other muscles (e.g., 3% to 6% DMSO enhances the contraction of the heart and stomach). ◦ DMSO applied topically to the skin of patients produces electromyographic evidence of muscle relaxation 1 hour after application, while another study found 50% DMSO prevented the contraction of frog skeletal muscles.

◦ A 1966 study found that (as shown by electromyography) muscles in spasm will relax within 60 minutes of topical application. It also found that this relaxation could be used to treat headaches associated with cervical disease and complex regional pain syndrome.

BOTOX  
FILLER  
URGENT CARE  
PDO THREADING  
MICRONEEDLING  
IV VITAMIN INFUSION**

**(505) 469-3815**

◦ As muscle tension is a frequent cause of pain and musculoskeletal disorders, this property likely accounts for some of its efficacy for those conditions.

#### • Circulatory enhancement

DMSO removes blood clots and increases blood circulation and has been recognized to eliminate the pain associated with blood clots. This aligns with Chinese medicine's view that poor blood flow causes sharp, piercing pain.

#### • Headaches

Tension headaches (e.g., those caused by muscular tension of the neck) and sinus headaches tend to respond to DMSO (with relief typically lasting 4 to 6 hours), whereas migraine and cluster headaches are less responsive to DMSO.

#### • Fibromyalgia

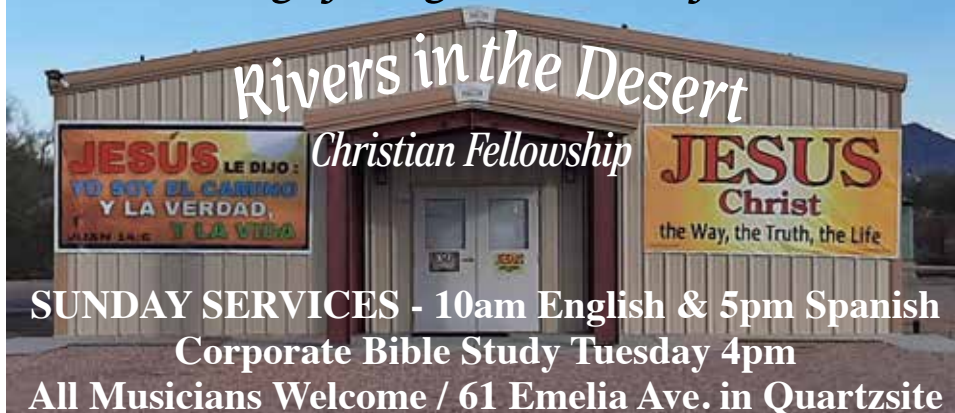

The pioneer of DMSO reported that DMSO helped 70% of Fibromyalgia patients (with none experiencing side effects), and there are many published examples of it healing this condition.

#### • Spinal Pain

Many of the most profound benefits from DMSO are found in patients with spinal issues (e.g., spinal stenosis, a failed back surgery, surgical scars, severe arthritis, previous spinal cord injuries, or bulging discs), and numerous testimonies (e.g., many can be found in the 1980 Congressional hearing on DMSO) exist of individuals who had been in years of crippling pain suddenly getting their lives back because of how effectively DMSO treated their pain and restored their mobility.

## Bitcoin and the Future of Financial Freedom

by: Greg Reese 12/12/2024  
[GregReese.substack.com](http://GregReese.substack.com)

After Trump was elected, Bitcoin surged passed 100,000 for the first time. Trump has said that he will somehow maintain USD dominance against the BRICS nations. Michael Saylor suggested a radical way to do this: "So the very simple idea is buy 20 or 25% of the Bitcoin network, on behalf of the US government, catalyze the development of that world reserve capital network, and then let all the Chinese and the Russians and the foreigners sell all their other assets and buy bitcoin, and then the money flows into the United States. If you want to put a great twist on it, dump your gold, sell all the US gold, buy bitcoin, then the trade is free, because you could buy 5 million Bitcoin for the cost of the gold, you will demonetize the entire gold asset class. And our enemies hold gold in their banks, so their assets would go to zero. Our assets would go to \$100 trillion and we would control the world's reserve capital network, as well as the world's reserve currency network.

The scheme to magically wipe away the current deficit Trump alluded to in the recent past. "Who knows? Maybe we'll pay off our \$35 trillion dollars, hand them a little crypto check right, hand them a little Bitcoin and wipe out our \$35 trillion dollars."

Early Bitcoin advocate Roger Ver is being threatened with 109 years in prison for tax evasion, even though he renounced his U S citizenship in 2014. Weeks after publishing his

book *Hijacking Bitcoin, Hidden History of BTC*, Roger Ver was arrested by Interpol in Spain and has been held in the country at the behest of the US government. He was recently interviewed by Tucker Carlson as to why the US government is after him.

Roger Ver: "There was no doubt in my mind whatsoever that people were going to start using Bitcoin as money. So I thought, oh, this is every libertarian's dream come true. Suddenly, now we're going to have a choice. Bitcoin was supposed to be money for the world. Bitcoin was supposed to be used for payments, as peer to peer cash for the world. That's how people were using it. I was doing payroll on it, and I was paying my suppliers overseas. Later, this giant wave of censorship took place. Anonymous people that nobody knows their real names managed to get control of all the main discussion platforms for Bitcoin, and then suddenly, one day, overnight, nobody was even allowed to advocate for Bitcoin being used as money, and they censored

anybody that tried to do that. Initially, everybody saw through it but then everybody that came to Bitcoin after the censorship began, just started believing it. Today, the main people that are out there promoting Bitcoin, they literally say, oh, Bitcoin shouldn't compete with the US dollar. You shouldn't use it as money. You shouldn't use it to pay for things, Bitcoin is just a digital asset. You should just hold it. However, it's the exact opposite. Through the censorship and the propaganda, they've literally hijacked Bitcoin, and I literally wrote an entire book about it. You can find more at [HijackingBitcoin.com](http://HijackingBitcoin.com) it's available on Amazon and everywhere else. Lo and behold, just a couple of weeks after the book gets published, I get arrested, and now I'm facing 109 years in federal prison for having exposed the way in which Bitcoin was hijacked."

Tucker Carlson: "Is it now possible to conduct any kind of business with crypto anonymously?"

Roger Ver: "So in the early days, everybody thought Bitcoin was basically anonymous and people treated it that way. Then websites came up that were selling things that governments might not necessarily want you to buy. People were using Bitcoin for that because they thought it was basically anonymous. Later on, we found out that it wasn't anonymous at all. But additional steps were taken to make Bitcoin even less anonymous. Today, most people are just using custodial wallets, which are not even a wallet, it's just an account, and it's no more

private than your Bank of America or PayPal account. In fact, it's even less private. People are claiming that Bitcoin is freedom money, but I'm really afraid that they're literally building the financial prison walls around themselves. If you look at what's going on in El Salvador, everybody's excited about Bitcoin there, but they're all using custodial accounts that the government can see every single transaction you're making, and they can freeze your account at any time. That's the exact opposite of economic freedom. That's economic government control. So anybody that's paying attention should be really, really concerned about this, and they should be advocating the use of cryptocurrencies in which individuals can actually have control of their own money and have control over their own lives, their own destiny. Maybe that'll be Bitcoin thanks to this new technology called confidential layer that bridges it onto Zano. I don't know what it's going to be, but we need to be really, really careful, because before we know it, and before we realize that we've built the financial prison walls around us, it's too late to get out and too late to escape."

Tucker Carlson: "So it doesn't sound like you're suspicious that Bitcoin was created by the Intel agencies as a way, as a kind of trap for people."

Roger Ver: "I don't, I don't think it was created that way initially, but I am suspicious. I do think that the intelligence agencies and other groups converted it and hijacked it into becoming a financial trap." Learn more at [FreeRogerNow.org](http://FreeRogerNow.org).

## 2024 Christmas Toy Drive

Brotherhood Rogue Riding Group in conjunction with VFW 769 Auxiliary wishes to thank the residents of Quartzsite and

Ehrenberg for a very successful 2024 Toy Drive. We gifted numerous toys, bikes and personal hygiene items to a

multitude of children of all ages. Thank you once again for your generosity.

### THE HISTORY OF CAMELS IN ARIZONA

ROGER MANSFIELD

Are you curious about camels playing a role in the history of America and Arizona? If you answered “YES” then this is a **MUST-READ BOOK** for you! By reading this book you will get a glimpse of relatively unknown events that make this chapter of our history truly captivating and fascinating.

**GET YOUR COPY AT:**

**QUARTZSITE CHAMBER OF COMMERCE**

**79 W. Main Street, Quartzsite, AZ 85346  
or Online @ [qzcoc.org](http://qzcoc.org)**

All proceeds will benefit the Quartzsite Chamber of Commerce because it has demonstrated a commitment to preserving the Community’s rich historical legacy that involves America’s and Arizona’s experience with camels.

### Insights on Counterterrorism and the Taliban

In episode #149 of the Shawn Ryan Show, host Shawn Ryan (a former U.S. Navy SEAL and CIA contractor) interviews Sarah Adams (a former CIA officer and counterterrorism expert) on pressing global and domestic security issues. The conversation spans intelligence gaps, the resurgence of the Taliban, the complexities of global funding networks, and the broader implications for terrorism and international stability. Adams draws on her extensive experience to paint a vivid picture of the challenges facing the counterterrorism community and offers a compelling call to action for greater accountability and strategic reassessment.

#### Intelligence Gaps and Evolving Terrorist Strategies

Adams begins by highlighting the persistent intelligence failures that undermine global counterterrorism efforts. Despite decades of focus on groups like Al Qaeda, their ability to adapt and evolve continues to pose a significant threat. She notes that intelligence agencies often fail to anticipate the dynamic nature of extremist organizations, allowing them to develop new tactics and exploit vulnerabilities. For example, figures like Hamza bin Laden—an emerging leader in Al Qaeda—represent a new generation of jihadists who employ both traditional and unconventional methods to evade countermeasures. The lack of coordinated global intelligence-sharing mechanisms exacerbates this issue, leaving governments reactive rather than proactive.

#### The Resurgence and Funding of the Taliban

A critical focus of the discussion is the Taliban's resurgence, particularly after

the U.S. withdrawal from Afghanistan in 2021. Adams outlines how the group has not only regained political control but has also secured a steady flow of funding from various sources. This financial backing has allowed the Taliban to consolidate power, rebuild their infrastructure, and exert influence over Afghanistan and its neighbors.

#### Key Funding Sources

**Drug Trade:** Adams explains that Afghanistan's opium production is a cornerstone of the Taliban's financial strategy. The country remains the world's largest producer of opium, with the Taliban taxing every stage of the drug trade—from cultivation to trafficking. These revenues are funneled directly into their military operations, enabling the group to pay fighters, purchase weapons, and sustain governance in controlled areas. The illicit drug trade also benefits other extremist groups, creating a network of organizations that destabilize the region.

#### Foreign Governments and State Actors:

Adams draws attention to the role of foreign actors, particularly Pakistan, in supporting the Taliban. She suggests that while governments

may not openly admit their involvement, covert financial and logistical support plays a significant role in sustaining the group. Additionally, nations like China and Russia may indirectly empower the Taliban by leveraging them as tools to counter Western influence in the region. This geopolitical chess game further complicates international counterterrorism efforts.

#### Taxation and Extortion:

Within Afghanistan, the Taliban operates as a de facto government, collecting taxes from businesses, farmers, and local communities. This system of taxation extends even to international humanitarian aid flowing into the country. Adams underscores that these funds often bypass developmental needs and go straight to bolstering the Taliban's military capabilities.

#### Private Donations and Cryptocurrency:

Adams highlights the role of private donors, particularly from the Middle East, in funding the Taliban. While some donations may be made under the guise of humanitarian support, they are often channeled to extremist causes. Additionally, the increasing use of cryptocurrency provides the Taliban with a relatively anonymous means of transferring funds, circumventing sanctions and traditional banking systems.

#### Implications of Taliban Funding

The financial empowerment of the Taliban has far-reaching consequences. First, it strengthens their ties with other extremist organizations like Al Qaeda, creating a broader and more resilient network of terrorism. Second, it destabilizes Afghanistan, perpetuating poverty, human rights abuses, and lack of access to basic services. Third, it undermines Western geopolitical influence, emboldening extremist groups worldwide.

#### Reflections on Benghazi and Abandoned Allies

Adams revisits the 2012 Benghazi attack, where U.S. diplomats and intelligence personnel were targeted in Libya. She cites this incident as a poignant example of what happens when intelligence failures intersect with inadequate governmental response. The aftermath of Benghazi

not only strained U.S. credibility but also left key allies feeling abandoned. Adams connects this to the broader issue of U.S. disengagement in volatile regions. She argues that the withdrawal from Afghanistan and subsequent abandonment of local allies has parallels to Benghazi. Such actions send a dangerous message to partners who risk their lives to support U.S. missions, eroding trust and cooperation in future endeavors.

#### Emerging Threats and Domestic Security

Adams discusses how the Taliban's resurgence and evolving terrorist strategies pose a direct threat to domestic security in Western nations. With access to advanced technologies and unconventional methods, extremist groups are finding new ways to infiltrate and disrupt global systems. Cyberattacks, drone warfare, and the use of cryptocurrencies are just some of the tools these groups now employ. Adams warns that these strategies could lead to a rise in domestic terrorism, as extremist ideologies spread across borders. The ability of groups like the Taliban and Al Qaeda to inspire lone-wolf attacks in Western countries remains a significant concern.

#### Call to Action: Addressing the Challenges

Throughout the interview, Adams stresses the need for decisive action to address these challenges. She proposes several solutions:

#### Combat the Drug Trade:

International efforts must focus on dismantling the opium trade in Afghanistan. This requires targeting not only the production and trafficking networks but also providing alternative livelihoods for farmers reliant on opium cultivation.

#### Sanctions & Financial Oversight:

Adams advocates for stricter enforcement of sanctions against individuals and entities supporting the Taliban. Enhanced oversight of cryptocurrency transactions and international donations is also necessary to disrupt funding channels.

#### Diplomatic Pressure:

Nations suspected of supporting the Taliban must face diplomatic repercussions. Adams suggests leveraging institutions like the UN to build coalitions aimed at curbing financial and logistical support for the group.

**Mask mandates return in multiple states as doctors warn of 'quad-demic' of 4 viral infections** | 2 Jan 2025 | DailyMail.co.uk | Four viruses are hitting the US as millions go back to work after the holidays, data show. Official figures reveal that infections caused by flu, Covid, RSV (a respiratory illness that causes the cold) and norovirus (sometimes called the stomach flu) all started to surge over the Christmas period, when families gathered to celebrate. The surge in infections is prompting a return of mask mandates in some states, with a hospital system in Wisconsin this week becoming the latest to reinstate them. Hospitals in parts of California, Illinois, Indiana and New Jersey have also brought back the rules for staff and visitors. Officials in New York City are urging people to consider wearing a face mask on public transport. *[Do not comply.]*

**Ohio Gov. DeWine vetoes 'medical free speech' provision** | 4 Jan 2025 | LegitGov.org | Ohio Gov. Mike DeWine [R - RINO] let stand higher fees for public access to body cam footage but eliminated several provisions to other recently passed bills. DeWine announced late Thursday night he signed four bills into law but issued several line-item vetoes, including stopping provisions that would have allowed doctors to express different opinions from state views. The so-called "medical free speech protection" was a last-minute add to House Bill 315, a more than 400-page bill passed in the final hours of the last legislative session in December. The bill would have stopped state boards from disciplining doctors, pharmacists or other health care professionals who expressed medical opinions (either publicly or privately) that differ from the boards' views.

**Biden Commits 306 Million to Prevent 'Potential Bird Flu Outbreak' in Humans Ahead of Trump's Return to Office** | 4 Jan 2025 | LegitGov.org | The Biden regime has announced a 306 million investment to bolster bird flu monitoring and preparedness efforts across the United States to combat a so-called potential bird flu outbreak among humans,

right before handing over the reins to President-elect Donald Trump. In November, the Centers for Disease Control and Prevention (CDC) confirmed the first-ever case of avian influenza A(H5N1), commonly known as

H5N1 bird flu, in a child in the United States. The young patient, a resident of California, reportedly experienced mild symptoms and has since been recovering following treatment with flu antivirals. Last week, the CDC confirmed the first severe U.S. human case of H5N1 bird flu in a 65-year-old Louisiana man who had contact with sick backyard birds. Predictably, experts are now sounding the alarms about the virus's supposed mutations and potential for human transmission.

**Mystery disease outbreak in China overwhelms hospitals in chilling echo of Covid dark days** | 3 Jan 2025 | DailyMail.co.uk | China is reportedly being ravaged by a mysterious viral outbreak that is overwhelming some hospitals. Videos on social media appear to show hospital units overrun with patients in face masks, and parents holding sick children in long lines in pediatric units. There have also been unverified reports that crematoriums and funeral homes are being overwhelmed. The alarming scenes and lack of official commentary have led some to draw similarities to the early days of the Covid outbreak in China. Local news reports have blamed a little-known virus called human metapneumovirus (HMPV) (which normally causes a mild cold-like illness) for the latest outbreak, though officials have yet to confirm this.

**U.S. Plans 8 Billion Arms Sale to Israel** | 4 Jan 2025 | Reuters.com | Joe Biden's administration has notified Congress of a proposed 8 billion arms sale to Israel, two U.S. officials said, with Washington maintaining support for its ally whose war in Gaza has killed tens of thousands. The deal would need approval from House of Representatives and Senate committees and includes munitions for fighter jets and attack helicopters as well as artillery shells. The package also includes small-diameter bombs and warheads,

according to the sources. Some of the munitions deliveries could be furnished through current U.S. stock, while the majority would take up to several years to deliver, the source said.

**Mike Johnson Elected Speaker of the House After GOP Dis-senters Change Their Votes** | 3 Jan 2025 | Breitbart.com | Rep. Mike Johnson (R-LA) officially won the Speaker's gavel after a few initial holdouts, receiving 218 votes -- enough to secure the position. Reps. Thomas Massie (R-KY) followed through with his pledge to vote against Johnson, casting a vote for Rep. Tom Emmer (R-MN). Rep. Ralph Norman (R-SC) initially did not vote for Johnson either, instead choosing Rep. Jim Jordan (R-OH). Republican Rep. Keith Self (R-TX) voted for Rep. Byron Donalds (R-FL) for Speaker initially, but ultimately, the latter two changed their votes, putting Johnson over the edge on the first ballot. That brought Johnson to 218 votes, securing enough support to be elected Speaker once again.

**Mysterious fog sweeping U.S. sparks bioweapon fears amid alarming echoes of secret 1950 military program** | 3 Jan 2025 | DailyMail.co.uk | A thick, "mysterious" fog has descended upon a wide swath of the U.S., sparking fears of another "Operation Sea Spray." For one week in September of 1950, the U.S. Navy sprayed massive amounts of bacteria into the air two miles off the coast of San Francisco, California. The aim of this secret biological warfare experiment was to learn how vulnerable large U.S. cities like San

Francisco would be to a biowarfare attack by terrorists [the CIA, etc.]. Now, 75 years later, some Americans fear this may be happening again as they claim an "unnatural" fog with a "burning chemical-like smell" has plagued their communities in recent weeks. Parts of Texas, Wisconsin, Iowa, Maryland, Virginia, West Virginia, Nebraska, Kansas, Oklahoma, North Dakota, Florida, and Minnesota were under fog alerts when the bizarre reports surfaced this week.

**New Orleans Police will upgrade security for Super Bowl, Mardi Gras** | 3 Jan 2025 | LegitGov.org | In a letter released Friday afternoon, the New Orleans Police Department says there will be increased security presence in concert with other agencies in the French Quarter. This comes a few days after a deadly terror attack killed 14 people and injured at least 35 on New Year's Day when a truck was driven into a crowd in the city's oldest neighborhood. The letter by Officer Reese Harper, the department's director of communications, said Bourbon Street will be closed to vehicles from 6 p.m. until 6 a.m. "to ensure the pedestrian mall remains a safe space for everyone." The department also said additional crowd closures of side streets or major routes will be done as needed, depending on crowd size or special events. One of those special events is the 59th Super Bowl at Caesar's Superdome on Feb. 9.

**New York judge sets Trump sentencing days before inauguration** | 3 Jan 2025 | FoxNews.com | President-elect Trump's bid to toss his conviction in his New York criminal hush money case was denied

on Friday. New York Judge Juan Merchan rejected Trump's request to vacate the verdict in the case based on the Supreme Court's presidential immunity decision. Sentencing is set for January 10 at 9:30 a.m, with the president-elect having the option to appear in person or virtually. But Merchan said he will not sentence the president-elect to prison. Merchan wrote in his decision that he is not likely to "impose any sentence of incarceration" but rather a sentence of an "unconditional discharge," which means there would be no punishment imposed. Trump will be sworn in as the 47th President of the United States on January 20.

**U.S. winter storms could cause power outages, cut natural gas supplies** | 3 Jan 2025 | Reuters.com | Freezing weather and snow storms across the U.S. could cause massive power outages over the next week and boost natural gas demand to its highest levels of the winter, according to energy analysts and reliability coordinators. The bump in demand comes as supplies of gas could drop due to the freezing of oil and gas wells and pipes, known in the energy industry as so-called "freeze-offs." The jump in demand coupled with a drop in supply could drive up prices next week. "Appalachia and Rockies production face freeze-off risks a temperature drop into the single digits or below," analysts at energy consulting firm Gelber and Associates said in a note.

**New Biden water heater ban will drive up energy prices for poor, seniors - expert** | 5 Jan 2025 | NYPost.com | The Biden regime is banning certain natural gas water heaters from the market as part of its climate change [aka the WEF's "You'll own nothing, and you'll be happy"] agenda, a move critics say will jack up energy costs for low-income and senior households. The move in the final days [God willing] of the regime will take non-condensing, natural gas-fired water heaters off the shelves by 2029 in a bid to reduce carbon dioxide emissions, which climate change advocates [corporate socialists] and Joe Biden say cause global warming. The new rules will require new tankless

gas water heaters to use about 13% less energy than today's least efficient tankless models. The rules apply to both non-condensing and condensing gas water heaters, but the rules hike efficiency requirements to a threshold that only condensing models can meet, effectively banning the cheaper but less efficient non-condensing models, according to The Washington Free Beacon.

**Biden honors Dem donor George Soros, Hillary Clinton with Presidential Medal of Freedom, sparking outrage: 'A national disgrace'**

| 4 Jan 2025 | NYPost.com | Joe Biden bestowed woke Democratic megadonor George Soros with the Presidential Medal of Freedom on Saturday -- outraging critics who ripped the selection as a "national disgrace." Soros, 94, was among the 19 people chosen to receive the nation's highest civilian honor at the White House, a group that included actor Denzel Washington and former senator Hillary Clinton -- who also was panned as a recipient. "George Soros spent millions electing soft-on-crime politicians that let criminals wreak havoc in our major cities," Montana Senator Tim Sheehy told The Post. "Hillary Clinton abandoned our Navy SEALs in Libya." "Joe Biden's decision to give Hillary Clinton and George Soros the Presidential Medal of Freedom is a national disgrace," the GOPer added.

**Congestion toll takes effect, costing NYC commuters \$9 to drive below 60th Street - as drivers rip plan and trash Hochul** | 5 Jan 2025 | NYPost.com | Motorists heading into some of Manhattan's busiest neighborhoods have begun shelling out a first-in-the-nation \$9 congestion toll, a controversial levy critics contend will drive people out of Gotham and devastate the local economy. The scheme officially took effect at midnight on Sunday, meaning drivers entering the city below 60th Street will now have to pay \$9 during peak hours, 5:00am to 9:00pm on weekdays and 9:00am to 9:00pm on weekends and \$2.25 for off-peak hours. During peak hours, large trucks will pay \$21.60, small

trucks \$14.40 and motorcycles \$4.50.

**New Jersey Teachers No Longer Required to Pass Basic Literacy Test** | 3 Jan 2025 | CampusSafety-Magazine.com | Aspiring teachers in New Jersey are no longer required to pass a basic skills test in order to be certified. New Jersey Democratic Governor Phil Murphy passed Act 1669 as part of the state's 2025 budget in June to address a teacher shortage, Read Lion reports. The law went into effect on Jan. 1, 2025. Individuals seeking an instructional certificate will no longer need to pass the Praxis Core Test, a basic skills test for reading, writing, and math that is administered by the state's Commissioner of Education. "We need more teachers," Democratic Sen. Jim Beach, who sponsored the bill, said in May 2024 when the chamber cleared the bill in a 34-2 vote. Just a few months prior, Murphy also signed a similar bill into law that established an alternative pathway for teachers to sidestep the testing requirement.

**Justin Trudeau resigns as Canadian Prime Minister after disastrous liberal policies tanked the economy and Trump's merciless trolling rocked his administration** | 6 Jan 2025 | LegitGov.org | Justin Trudeau dramatically resigned as Canadian Prime Minister on Monday in remarks capping a spectacular fall from grace for the liberal standard-bearer just days before Donald Trump enters office. With his government in turmoil, a clearly dejected

Trudeau, 53, said Parliament would be suspended until March 24 while his Liberal Party chooses a new leader. The scion of one of Canada's most famous political families had become deeply unpopular in recent years over a range of issues including the soaring cost of food and housing, and surging immigration. Trump has repeatedly mocked the Canadian leader by suggesting his country would be better off as the 51st U.S. state.

**Drones in US Skies is a Psyop for DOD Power Grab, Warns Legendary Psychiatrist** | 2 Jan 2025 | LibertySentinel.substack.com | The drone saga

might be a psyop to bring about a DOD/DHS Orwellian power grab, argues Dr. Peter Breggin.

The massive drone swarms being reported in U.S. airspace are likely part of a psychological operation to justify a huge power grab by the federal government, warned legendary psychiatrist Dr. Peter Breggin in an interview on Conversations That Matter with The New American magazine's Alex Newman. Dr. Breggin, who was trained at Harvard and wrote the best-selling book COVID19 and the Global Predators, pointed to comments made by Biden officials and officials with the incoming administration seeking expanded federal power over drones. The goal, ultimately, is to control Americans, he said. Breggin's arguments on this issue have gone mega-viral across the internet, sparking a lively discussion. **[Interview at TPFPnews.com]**

## Things They Didn't Teach You in Church: The Wicked

by: Jim Brouillette  
CCHW Real News HQ  
(Rumble and YouTube)  
[ChristChurchOfTheHolyWord.com](http://ChristChurchOfTheHolyWord.com)

For me, the New Year is always a time of reflection; what's going right, what's going wrong, what I need to do to promote the right and correct the wrong. I try to compare my life with the rest of the world. It seems like there is a lot to feel good about in the world right now and I feel guardedly optimistic about the future. There are, however, disturbing and worrisome things going on in our society as we accelerate into 2025. Recent events exposed some frightening changes taking place, particularly within the U.S. and global society. Sometimes they are most evident within the younger generation, many of whom don't seem to be able to distinguish between good and evil.

The decision (by our society and government) to put the rights of a group of people that number less than 1/10 of 1% over the rights of more than 1/2 of the entire population of this country is mind boggling! Whatever happened to Feminism? Whatever happened to the Women's Rights Movement? They are a thing of the past when you allow and promote males participating in women's sports. They are a thing of the past when you allow the mutilation of young girls in the name of Transgenderism, and allow groomers to teach their garbage in our schools. Something has happened to the rational and morality of many of our citizens, which does not align with the Word of God.

We know that wicked people exist in this world; their aim for thousands of years has been to infect and destroy our youth and lead them down a path of evil. The wicked of this world don't learn their evilness, the Bible tells us they are born that way. Psalms 58:3 teaches. ***"The wicked are estranged from the womb:***

***they go astray as soon as they be born, speaking lies."***

We are fighting a spiritual war although we are stuck in this physical dimension. Ephesians 6:12 teaches. ***"For we wrestle not against flesh and blood, but against principalities, against powers, against the rulers of the darkness of this world, against spiritual wickedness in high places."***

On October 7, 2023, the worst attack against Jews since the Holocaust took place when, according to the Jerusalem Post approximately 1200 innocent people were murdered and 250 were taken captive by Hamas terrorists, because they were Jewish. This attack was unprovoked and committed against innocent young people because of their ethnicity. Antisemitism has been around forever, but also disturbing is the reaction of some American youth who support the actions of Hamas. According to NPR less than 50% of Americans "think Israel's response has been appropriate", and less than 50% of Gen Z/millennials feel the U.S. should publicly support Israel. That means, whether they admit it or not, they support the terrorists. Published studies by AXIOS and others show that women aged 18 to 29 and women aged 65 and up are progressively becoming more liberal at an alarming rate and are more likely to support radical issues; groups such as Hamas and its attacks against Israel.

There is a telling bond between these vastly different age groups of women. A majority of these women are college educated. This is not an unrelated coincidence, these women have all been indoctrinated by the Hidden Dynasty of Education which, is a major topic in my book THE FOUR HIDDEN DYNAS-

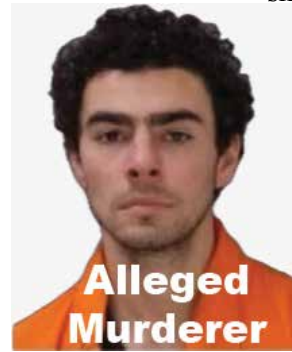

TIES OF THE BIBLE; it has been hard at work indoctrinating college students in liberal, Marxist ideologies for decades. The results of this indoctrination are now emerging in several different factions of our society.

The recent execution style, assassination of United Healthcare CEO, Brian Thompson, is a glaring example.

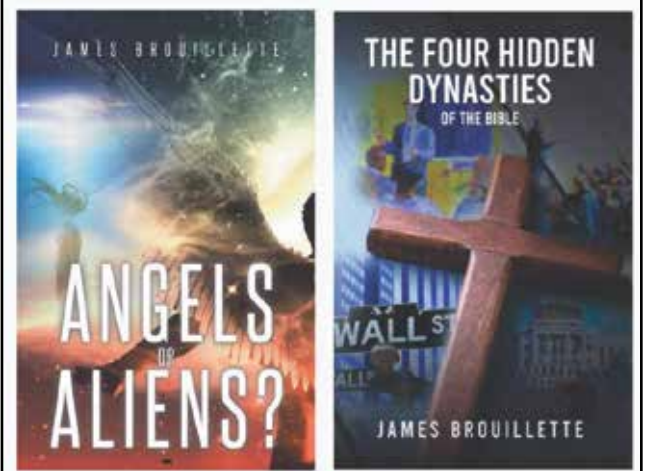

This man was shot in the back while on his way to a business meeting, in Midtown Manhattan. According to ABC News there have been several online defense funds created, raising over \$200,000, for the defense of the accused murderer. There have been over 40,000 positive reactions to Thompson's murder on Facebook, a cheering crowd met the alleged murder upon his arraignment in N.Y., and hundreds of women have been sending communications to the killer because reportedly they find him very attractive.

This revolting outpour of monetary support and even romantic proposals

**Alleged Murderer**

was instantaneous and reported widely. On Saturday Night Live 12/14/24, this nation's positive reaction to the murderer was the subject of some Chris Rock monologue jokes. Rock stated that the media seemed fixated on the murderer's looks instead of the alleged murder. "I really feel sorry for the family," Rock said. "Everybody's fixated on how good-looking this guy looks... If not, they would have given him the chair already - he'd be dead." Rock continued: "But he actually killed a man... a man with a family, a man with kids... this is a real person... but ... You know, some-

times drug dealers get shot. I mean, you've seen The Wire, right?"

On the same SNL broadcast, Sarah Herman, spoofing Nancy Grace stated "... y'all psychos made him a sex symbol.... the healthcare assassin.... has got women and gay guys alike hot and bothered.... I mean, women love bad boys." The assassin was also the subject of the Weekend Update segment of the show, making fun of his arrest and his future in the media speculating about the murderer's possible Netflix special. The Daily Mail.com slammed SNL for their "classless" jokes concerning the assassination, but much of SNL's audience thought the material was hilarious.

Make no mistake, a considerable portion of the people we share this planet with are evil and wicked and it won't get any better as time passes. Jesus warned us about this situation when He explained the Parable of the Tares. **Matthew 13:38** ***"The field is the world; the good seed are the children of the kingdom; but the tares are the children of the wicked one."*** Before the sun dawned in 2025, wickedness struck again on the streets of the French Quarter in New Orleans, and still our children continue to chant "from the river to the sea."

## Cybertruck Bomber And New Orleans Terrorist Were Both Military Veterans Who Served At The Same Base

by: Blake Wolf 01/02/2025  
One American News Staff  
[www.oann.com](http://www.oann.com)

The now-deceased man responsible for Wednesday's Cybertruck explosion in front of the Las Vegas-based Trump Hotel was a U.S. Army Green Beret who was previously deployed to Afghanistan twice, according to The Associated Press.

The man also reportedly served at the same base as the New Orleans (NOLA) New Year's Day terrorist, who drove a rented truck with an ISIS flag through a crowd of people in the early hours of the morning. Additionally, both he and the NOLA terrorist utilized the same company to rent their vehicles.

37-year-old Matthew Livelsberger had parked his rented Cybertruck in front of Trump's Las Vegas hotel. The vehicle was full of firework-like explosives, eventually going off and injuring seven bystanders near the blast in addition to killing Livelsberger. Metropolitan Police Department Sheriff Kevin McMahon explained that he was found dead inside the vehicle with a "self-inflicted gunshot wound" to the head, with the handgun found at his feet.

Livelsberger reportedly served in the Army since 2006, rising up the ranks through multiple deployments until he was able to serve in the Green Berets, a highly trained special forces unit working to combat terrorism. The former Green Beret was also awarded two Bronze Stars, along with a valor device for courage under fire,

a combat infantry badge, and an Army Commendation Medal with valor.

The FBI stated that it was "conducting law enforcement activity at a residential address in Colorado Springs," adding that the activity "is related to the explosion in Las Vegas on Wednesday; due to the ongoing nature of the investigation, no further information will be provided out of Denver."

Livelsberger's time in the military saw him working closely with critical intelligence capabilities in the special forces, allowing him access to highly sensitive military information. He was most recently stationed at Camp Panzer Kaserne in Germany, where he served as a remote and autonomous systems manager responsible for "operations, maintenance and integration" of drones for the Army.

Meanwhile, Livelsberger has now been linked to Shamsud-Din Jabbar, the radicalized terrorist and former Army veteran who killed at least 15 people on New Year's Day after ramming his truck into a crowd of people on Bourbon Street in New Orleans. Both men rented

the vehicles they used to commit their attacks from "Turo," a vehicle rental company, simultaneously attacking within a few hours of each other.

Both men also served at Fort Bragg, now known as Fort Liberty in North Carolina. Another strange "coincidence" is that Jabbar and Livelsberger also both reportedly lived in North Carolina at the same time, according to the New York Post.

### Counterterrorism and the Taliban

• **Support Afghan Civil Society:** Empowering Afghan civil society organizations and grassroots movements is essential. By promoting education, women's rights, and economic development, the international community can counteract the Taliban's influence.

### Broader Global Implications

Adams emphasizes that the issues surrounding the Taliban are not confined to Afghanistan. Their resurgence serves as a model for other extremist groups, demonstrating that perseverance can lead to eventual success against Western forces. This emboldens terrorist organizations worldwide, posing a long-term threat to global stability.

Furthermore, the financial networks supporting the Taliban often overlap with those of other criminal organizations, from human traffickers to arms dealers. Disrupting these networks requires a coordinated international effort that transcends traditional counterterrorism measures.

### Conclusion

Sarah Adams' discussion with Shawn

Ryan sheds light on the intricate web of factors that sustain global terrorism and destabilize regions. From intelligence gaps to the resurgence of the Taliban, her insights underscore the urgency of reevaluating counterterrorism strategies.

Adams' call to action is clear: governments must adopt a proactive approach, addressing not only the symptoms of terrorism but also the underlying factors that enable groups like the Taliban to thrive. By disrupting funding sources, fostering international cooperation, and supporting vulnerable communities, the global community can mitigate these threats and pave the way for a more secure future.

Adams' expertise and passion provide a sobering reminder of the stakes involved in counterterrorism. Her perspective serves as a rallying cry for greater vigilance, accountability, and collaboration in the face of evolving threats.

## ~ Government ~

In a few weeks a new transnational government will be sworn in to run our country.

### What Does the World Say?

Does it say that "anything goes" and "give me all I can get" for free? It seems that this is the thinking of many in our country today.

### What Does the Bible Say?

The Bible says we need to work and earn our way to eat.

**2 Thessalonians 3:10** says "for even when we were with you, we commanded you this: If anyone will not work, neither shall he eat."

**I Peter 2:13** tells us that we are to

"submit to the governing authorities"

**I Timothy 2:1** urges us to "pray for those that lead us."

Many times, the world tells us to do it "our way" but we have God-given laws to live by and God and his son, Jesus Christ, are the foundational parts of our government and that we should never forget.

There's a good reason that "In God we Trust" is on our currency.

Also, our Pledge of Allegiance continues to have the phrase "one nation Under God".

From the beginning, God's plan for governing us has been in place. **Romans 13:1-7** explains some of the rights of the Government, Punish the Guilty and reward the Innocent.

We have a responsibility to honor our laws with Obedience to the Government. Only when the Laws of the Land go against God's will should we not follow them.
